The green choice

The world is rapidly changing. Now, more than ever, the demand for sustainability and productivity is redefining what people and businesses want from their technology, and the world around them.

Printing is no exception, and by making the switch to business inkjets, Epson customers are making positive change.

Laser printer

From old, heat-based copiers
to new Heat-Free Epson inkjets

Inkjet printer

Epson inkjet versus competitor laser consumables and packaging

This is the amount of consumables waste produced by a typical laser versus the amount of consumables required by an equivalent Epson inkjet device over 5 years¹ (assuming 2,100 monthly print volume: 1,500 mono, 600 colour).

Business inkjet

Laser

The inkjet advantage

Epson inkjet printers use Heat-Free Technology to deliver advanced customer benefits.

Consistent high-speed printing

Epson Heat-Free Technology requires no heat to warm up when it is switched on or awoken from sleep. This means it starts printing immediately making it up to 50% faster from ready compared to laser printers², which need to preheat the fuser to print. Consistent high-speed printing is ensured, even for documents with high-printing density.

Less power consumption saves energy and money

Epson Heat-Free Technology uses up to 83% less energy than laser technology³ because it does not use heat to start up. As inkjets have no fuser unit to heat, this results in significantly less energy consumption.

Fewer replacement parts, lower environmental impact

Laser printers typically have more consumables and require periodic replacement of the drum, transfer belt and fuser in many cases. Epson inkjet produces up to 96% fewer used consumables than laser printers⁴. Thanks to Heat-Free Technology, our inkjet printers use fewer parts that need replacing than in a laser printer, and our printheads are not a consumable. This reduces the environmental burden of manufacturing and recycling the additional resources.

Less intervention increases productivity

The Heat-Free structure of Epson inkjet printers means that there are fewer parts that can fail, which reduces the amount of intervention required. As a result, Epson inkjet printers offer reliability and significantly reduced downtime.

Ink ejection process

Laser printer

Inkjet printer

High quality, low cost inks

Epson's DURABrite Ultra and DURABrite Pro inks are ISO 11798 certified, producing longer lasting prints in any business environment.

Perfect prints

Enhance your printed materials with high-quality graphics. By doubling the nozzle density, the new PrecisionCore print head produces 600dpi high-quality printing on plain paper.

Business quality documents

Increased pigment concentration in DURABrite Pro Ink produces brighter colours. As the pigment sits on the surface of the paper, the prints are hardly visible on the reverse side.

More choice

As ink is directly ejected, you can print on a wide range of paper, and because the ink partially penetrates the paper fibres, the ink doesn't fade over time.

Amazingly durable

As the pigment is infused with resin and also insoluble, you can benefit from durable prints resistant to water, smudging and highlighter pens.

Why choose Epson genuine ink?

Extend the lifespan of your printer

It's a fact that genuine Epson inks optimise the lifespan of your Epson printers. That's because our inks are designed and tested to fit perfectly with your printers and prevent clogging – extending the operations of your print heads.

Non-Epson compatible inks increase your risk of downtime and repairs, cause premature wear of components and ultimately, result in permanent damage to your printer.

Enjoy more reliability and quality

When it comes to reliability, nothing comes close to genuine Epson inks. Prior to arriving with you, they undergo extensive research and development, are manufactured in high-tech, purpose-built facilities, and are vigorously tested. So they're guaranteed to produce reliable and long-lasting results.

Non-Epson compatible inks mean unacceptable print quality, poor ink longevity that can be prone to tampering when archiving documents, and damage to the professional reputation of your company.

Keep your costs to a minimum

Cost is a critical consideration when choosing your printer inks. By choosing Epson genuine inks, you're reducing potential damage on two fronts – both to your Epson printers and to the bottom line of your business.

Non-Epson compatible inks carry financial implications. Although the low upfront cost can seem appealing, the bills soon add up. From replacing faulty products to printer maintenance; wasted time and resource through reprinting, to replacing unreliable cartridges – and even your printer itself – prematurely, your budget will undoubtedly take a hit.

Business imaging solutions

Discover how Epson and its partner solutions take advantage of our printers to meet the needs of businesses from SMBs to large enterprises, and can be adapted to suit vertical market needs.

Fleet management

Epson Device Admin (EDA)

Control, analyse and manage your printer fleet centrally from one intuitive interface, designed to increase productivity, reduce costs and ensure maximum security.

Remote Service and Support

Epson Remote Services (ERS)

Epson's cloud-based device monitoring and management system helps your service provider to perform accurate remote diagnosis without compromising on the security. Arm service technicians with the information they need to achieve higher first fix rates and increase your device uptime.

ERS embedded agent

Benefit from the added value of ERS in combination with the embedded agent for a seamless setup and use.

Mobile and cloud printing

Mobile and Cloud printing

Turn your tablet or smartphone into a powerful office assistant. Epson's mobile and cloud printing services allow you to print and scan from your smartphone and tablet - in the office and on the go.

Workflow and security

Epson Print Admin (EPA)

Boost productivity and monitor print usage via a server-based solution that creates a secure printing, scanning and copying environment through user-authentication.

Epson Print Admin Serverless (EPA Serverless)

Seamlessly integrate devices into your security and compliance rules and regulations, without the burden of maintaining a server system.

Document Capture Pro (DCP)

Scan, save and share information easily. Advanced features for naming, separating and routing documents makes scanning simple and logical.

Document Capture Pro Server (DCPS)

For our multi-function devices, with Document Capture Pro Server administrators can manage push scan functions without installing software on individual computers.

Third party integration

Epson Open Platform (EOP)

Gain complete control of your printing operations via a web-based application that enables you to adapt your printer to meet specific and changing business requirements with solutions that help you better manage your printing.

For more about Epson and third-party solutions please visit www.epson.eu/bis

WorkForce Enterprise

Radically fast ISO print speeds of up to 100ppm, departmental office printers that deliver the ecological benefits that only inkjet technology can offer.

WorkForce Enterprise WF-C20600 Multifunction printer

- A3+ up to 4-in-1 colour with SRA3 support*
- Print speeds of up to 60 ppm
- Fast first copy out time (FCOT) of 5.6 seconds⁵
- Print up to 100,000 pages in mono and 50,000 pages in colour without changing supplies⁶
- 22.7 cm colour touch-screen
- High speed DualScan
(Simplex 60 ppm / Duplex 110 ipm)
- Optional second ethernet port
- Low power consumption (180 W – 300 W)
- 2,350 sheet standard paper input
- 5,350 sheet max paper input
- Stapling, hole punch and folded booklet option
- Fax option
- Postscript & PCL Printer Control Language Emulation

WorkForce Enterprise WF-C20750 Multifunction printer

- A3+ up to 4-in-1 colour with SRA3 support*
- Print speeds of up to 75 ppm
- Fast first copy out time (FCOT) of 5.4 seconds⁵
- Print up to 100,000 pages in mono and 50,000 pages in colour without changing supplies⁶
- 22.7 cm colour touch-screen
- High speed DualScan
(Simplex 60 ppm / Duplex 110 ipm)
- Optional second ethernet port
- Low power consumption (180 W – 300 W)
- 2,350 sheet standard paper input
- 5,350 sheet max paper input
- Stapling, hole punch and folded booklet option
- Fax option
- Postscript & PCL Printer Control Language Emulation

**WorkForce Enterprise WF-C21000

Managed print and service

CoverPlus

Keep your business moving with CoverPlus

CoverPlus provides exceptional service and support to give our customers peace of mind. We'll help you choose the printers best suited for your needs and then provide high-quality ongoing support. CoverPlus ensures maximum up-time for your business, helping to protect your investment and allowing you to focus on your business.

- Up to five years' service and on-going support gives you added confidence in your investment
- Service delivery and repair within two working days reduces unforeseen down-time
- Visibility of total cost of ownership minimises unexpected service costs

Print365 offers hassle-free print management

No matter how big or small your printing needs are, you can relax in the knowledge that your business printing will be more cost-effective and interruption free. Benefit from on-site maintenance wherever and whenever you need it, automatic ink supply delivery, and a fixed-cost printing service that puts you in control.

Take control of your printing expenses with Epson Print Performance

A solution that accurately tracks and cuts printing costs. The pay-per-print includes all supplies, their automatic supply and on-site Epson warranty for the length of your contract.

No unexpected costs, just pay for what you print. No supplies ordering, no additional costs, no hassle — even for decentralised print fleets.

1 A comparison of the HP Colour LaserJet Pro M477dw and the WF-C579R based on manufacturer's published ink yield data.

2 Based on Epson calculations, the Epson WorkForce Pro WF-C8190DW uses 83% less energy than the HP Color LaserJet Enterprise M750dn, the highest-selling model in the A3 colour single-function 21-30ppm printer segment (IDC, Quarterly Hardcopy Peripherals Tracker, Q4 2015 to Q3 2019 shipments, published Q2 2020). Methodology based on 'Typical Energy Consumption', defined under and/or simulated with reference to the ENERGY STAR test procedure and presented in kWh per year. CO2 saving calculated as being proportional to energy saving, based on a per-territory average generation of kg CO2 per kWh electricity used.

3 Based on Epson calculations, Epson business inkjet time-saving calculated by comparison to business laser devices' average lowest "Print/Copy time" ("from Previous Job", "from Ready State" or "from Sleep State") as reported by ENERGY STAR, added to the time taken to print at maximum speed the remaining pages in an average sized office print job and multiplied by the average number of print jobs per year, according to Keypoint Intelligence. Laser printer models identified using IDC, Quarterly Hardcopy Peripherals Tracker, Q3 2016 to 2020 Q2 shipments, published Q2 2020.

4 Storage space comparison based on Epson calculations of storage space requirements for packaged consumables sufficient to print 6,000 pages on 12 SFP and MFP (3-in-1) printers selected from among the top-selling 50% of A4 monochrome laser printers (below-20ppm class) listed in IDC Worldwide Quarterly Hardcopy Peripherals Tracker 2019Q2 data FY17 results. Average toner package unit volumes and yields for each model were calculated by Epson using toner package dimensions and yields published by the manufacturer for each model (as of August 2019). Actual size and number of toner cartridges required varies by laser printer model. EcoTank consumables quoted yields are simulated figures calculated by Epson based on ISO/IEC24711 methodology using ISO/IEC19752 test pat.

5 Approx. based on internal testing; may vary depending on the number of copies selected, the output environment, as well as the settings for size, orientation, position of paper.

6 Approx. page yield. Actual yield will vary depending on images printed and usage conditions. For more information visit www.epson.eu/pageyield

7 Determined in accordance with ISO/IEC 24734 showing the average of ESAT from the Office Category Test for default A4 simplex and duplex. For more information, please visit www.epson.eu/testing

8 First page out time of 4.8 secs black / 5.3 secs colour from ready mode.

9 AirPrint-enabled printers work with iPhone 4s and later, iPad 2 and later, all models of iPad Air and iPad mini, and iPod touch 5th generation with the latest version of iOS, and Mac with the latest version of OS X.
