

Highly-secure printing with increased productivity

The SureColor SC-T7700D is a 44-inch fully integrated printing solution that offers highly-secure, productive printing, smart features and easy operation.

Versatile design and a compact footprint make the SC-T7700D easy to install in most working environments. Confidential documents are handled securely using enhanced IT and security features. High printing speeds and a dual-roll facility boost productivity. Supported by Adobe Postscript 3 as standard. Delivering the fastest processing times in the T-series range for the most complex image reproduction, and in the highest quality. (PDF, JPEG, TIFF, EPS, Cals-G4 data files.)

Secure printing of confidential documents

With its enhanced IT and security features, the SC-T7700D is a highly-secure printing solution for medium and large businesses. The printer's device access controls include encrypted pin/passwords and Access Control List (ACL). Secure communication is ensured with 802.1x network authentication, SNMPv3 and Device Identity Certificate (TLS). Encrypted SSD and NFC card authentication provide data protection for confidential documents.

Increased productivity with high-speed continuous printing

The SC-T7700D offers print speeds of up to 130m² per hour for increased productivity. Its 2.64-inch PrecisionCore MicroTFP printhead delivers exceptional output quality at high speed and also allows auto-switching between different media types or sizes.

Compact, contemporary design for greater versatility

With its compact footprint, the SC-T7700D is one of the smallest large format printers on the market. Its flat top surface handily serves as a proofing bench. The versatile design makes it an ideal fit for most offices, with a flat back, front and sides allowing installation tightly against walls and cabinets. All printer features are accessed easily from the front, including the intuitive interface for easier operation, and the retractable basket. Front access also makes routine maintenance quick and straightforward.

Enhanced image quality and mark-up prints with special red ink

The SC-T7700D supported by Adobe Postscript 3 as standard, creates the highest-quality and detailed printing using the 2.64-inch PrecisionCore MicroTFP printhead, Variable Sized Droplet Technology, and Nozzle Verification Technology. The 6-colour UltraChrome XD3 all-pigment inks include a new red ink that is useful for marking up CAD drawings, realistically replicating red hues and matching the exact colour of red in corporate logos.

Remote real-time print status monitoring

With the Epson Cloud Solution PORT platform, you can remotely monitor equipment across sites, or multiple printers at one site, anytime and anywhere.

The Production Monitor is one of the apps on the Epson Cloud Support PORT and provides clear, easy-to-understand graphics to see at a glance how each printer in your fleet is performing. Detailed data can be used to easily analyse productivity and receive daily operational updates from anywhere. Maintenance tracking and remote troubleshooting services improve productivity and efficiency.
