

# Switch to ultra-low-cost business printing

# Enjoy eco-responsible hassle-free printing

The demand for technology that delivers greater sustainability without compromising productivity, has never been more important. For printers, the future is Heat-Free. To make a positive change, switch now to Epson business inkjet printers.

The EcoTank Pro series of colour and mono devices delivers thousands of high quality pages without the cost and hassle of replacing ink cartridges. With A4 and A3+ options available, save time, cost and energy whilst suiting your needs.

Up to  
**50%**  
**faster** from ready compared  
to laser printers<sup>1</sup>

Up to  
**96%**  
**fewer used consumables**  
than laser printers<sup>2</sup>

Up to  
**50%**  
**less power consumption  
and CO<sub>2</sub>** than laser printers<sup>3</sup>

## Colour printer range

Fast and feature-rich, the EcoTank Pro colour series is designed for the home and office. From Wi-Fi connectivity to quick and easy scanning, these 4-in-1 multifunction devices comes with a multitude of features that allow you to be productive straight away.

## Mono printer range

Ideal for small offices and home offices, our affordable mono range includes single function, 3-in-1 and 4-in-1 printers. With a high ink yield of up to 11,000 pages included in the box, the mono series offers reliable and highly cost-effective printing<sup>4</sup>.

### ET-16680

A3 colour  
multifunction 4-in-1

### ET-5880

A4 colour  
multifunction 4-in-1

### ET-M16680

single function

# Reduce the cost of printing

## Remarkably low print costs

Thanks to Epson's revolutionary ink tank system that features cost-effective ink bottles, the range offers an ultra-low-cost-per-page.

## Fast printing

Benefit from impressive first page out times as quick as 5.5 seconds on certain models. Print at up to 25ppm in mono and colour<sup>5</sup>.

## Low power consumption

Reduce energy and cut overheads by using less power. With no warm-up time, save up to 50% on energy compared with laser printers.

## Easy-to-use

Check ink levels easily and replenish ink with our no-spill, mess-free refill system. The lock and fill system ensures each tank is filled with the right colour.

## High-quality printing

Ensure consistently high quality for every print with smudge- and highlighter-resistant inks.

Epson EcoTank ET-5880  
Outstanding SOHO Colour Inkjet All-in-One

The Epson EcoTank ET-5880 has claimed a BLI Summer 2020 Pick Award for Outstanding SOHO Colour Inkjet All-in-One.

*"A great value proposition; strong usability and performance for a low cost per page thanks to its high-yield ink tank system"*

# Boost office efficiency

## Fewer used consumables and packaging

Use fewer refill ink bottles compared with bulky toners needed in some laser printers. Save storage space and reduce the need for the deliveries of multiple refills.

## High print yield

The mono series offers a high print yield of up to 11,000 pages in the box<sup>4</sup>. Print up to 4,500 in mono and 2,800 in colour from the starter ink bottles included in the box<sup>6</sup>.

## Low maintenance

Save time with hassle-free maintenance thanks to a built-in, permanent print head for reliable printing.

## Print from anywhere

Download the free Epson iPrint app to print over Wi-Fi. Print from anywhere in the world using the printer's unique Epson Email Print email address.

## Mobile solutions

Connect your smartphone, tablet or laptop to your printer with Wi-Fi Direct. Use Apple AirPrint to print wirelessly from iOS devices to a nearby AirPrint-ready printer.

# Save energy and time with Heat-Free Technology

PRECISIONCORE  
HEAT-FREE

The EcoTank Pro range benefits from Heat-Free Technology to deliver advanced customer benefits.

## Consistent high-speed printing

Epson Heat-Free Technology requires no heat to warm up when it is switched on or awoken from sleep. This means it starts printing immediately compared to laser printers, which need to preheat the fuser to print. Consistent high-speed printing is ensured, even for documents with high-printing density.

## Less intervention increases productivity

The Heat-Free structure of Epson inkjet printers means that there are fewer parts that can fail, which reduces the amount of intervention required. As a result, Epson inkjet printers offer reliability and significantly reduced downtime.

## Fewer replacement parts, lower environmental impact

Laser printers typically have more consumables and require periodic replacement of the drum, transfer belt and fuser in many cases. Thanks to Heat-Free Technology, our inkjet printers use fewer parts that need replacing than in a laser printer, and our printheads are not a consumable. This reduces the environmental burden of manufacturing and recycling the additional resources.

## Less power consumption saves energy and money

Epson Heat-Free Technology uses less power than laser technology because it does not use heat to warm up. As inkjets have no fuser unit to heat, this results in significantly less energy consumption.<sup>3</sup>

1 Based on Epson calculations, Epson business inkjet time-saving calculated by comparison to business laser devices' average lowest "Print/Copy time" ("from Previous Job", "from Ready State" or "from Sleep State") as reported by ENERGY STAR, added to the time taken to print at maximum speed the remaining pages in an average sized office print job and multiplied by the average number of print jobs per year, according to Keypoint Intelligence. Laser printer models identified using IDC, Quarterly Hardcopy Peripherals Tracker, Q3 2016 to 2020 Q2 shipments, published Q2 2020.

2 Storage space comparison based on Epson calculations of storage space requirements for packaged consumables sufficient to print 6,000 pages on 12 SFP and MFP (3-in-1) printers selected from among the top-selling 50% of A4 monochrome laser printers (below-20ppm class) listed in IDC Worldwide Quarterly Hardcopy Peripherals Tracker 2019Q2 data FY17 results. Average toner package unit volumes and yields for each model were calculated by Epson using toner package dimensions and yields published by the manufacturer for each model (as of August 2019). Actual size and number of toner cartridges required varies by laser printer model. EcoTank consumables quoted yields are simulated figures calculated by Epson based on ISO/IEC24711 methodology using ISO/IEC19752 test pat.

3 Based on Epson calculations, the Epson EcoTank ET-5880 use 50% less energy on average than competing colour laser A4 MFPS 1-20ppm (IDC, Quarterly Hardcopy Peripherals Tracker, Q4 2015 to Q3 2019 shipments, published Q2 2020). Methodology based on 'Typical Energy Consumption', defined under and/or simulated with reference to the ENERGY STAR test procedure and presented in kWh per year.

4 Approx. page yield with the two bottles included in the box for the ET-M3180 and ET-M1180. Actual yield will vary depending on images printed and usage conditions. For more information visit [www.epson.eu/pageyield](http://www.epson.eu/pageyield).

5. Based on the ET-16680, ET-5880 and ET-M16680. Determined in accordance with ISO/IEC 24734 showing the average of ESAT from the Office Category Test for default A4 simplex and duplex. For more information, please visit [www.epson.eu/testing](http://www.epson.eu/testing)

6. Approx. page yield with the ET-5880 and ET-16680. Actual yield will vary depending on images printed and usage conditions. For more information visit [www.epson.eu/pageyield](http://www.epson.eu/pageyield).
