The greener choice

The world is rapidly changing. Now, more than ever, the demand for sustainability and productivity is redefining what people and businesses want from their technology, and the world around them.

Printing is no exception, and by making the switch to business inkjets, Epson customers are making positive change.

Shift from fossil fuels to renewable energy

Industrial areas to sustainable smart cities

Laser printer

From old, heat-based copier technology
to new Heat-Free Epson inkjets

Inkjet printer

The benefits of Heat-Free printing

Save time with consistent high-speed printing

Heat-Free Technology requires no heat to warm up when it is switched on or awoken from sleep. This means printing starts immediately.

Less power consumption saves energy and money

Heat-Free Technology uses less power because it does not use heat to warm up. As inkjets have no fuse unit to heat, this results in significantly less energy consumption.

Fewer replacement parts, lower environmental impact

Laser printers typically have more consumables and require periodic replacement of the drum, transfer belt and fuse in many cases. Thanks to Heat-Free Technology, our inkjet printers use fewer parts that need replacing.

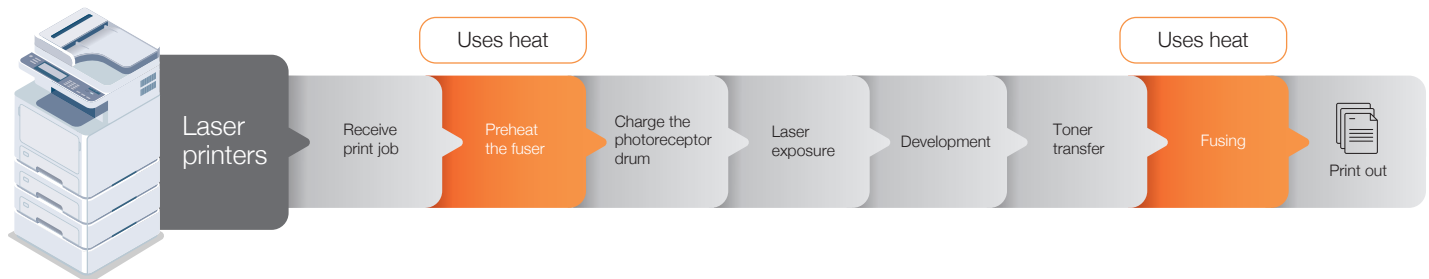

Less intervention increases productivity

The Heat-Free structure of Epson inkjet printers means that there are fewer parts that can fail, which reduces the amount of intervention required.

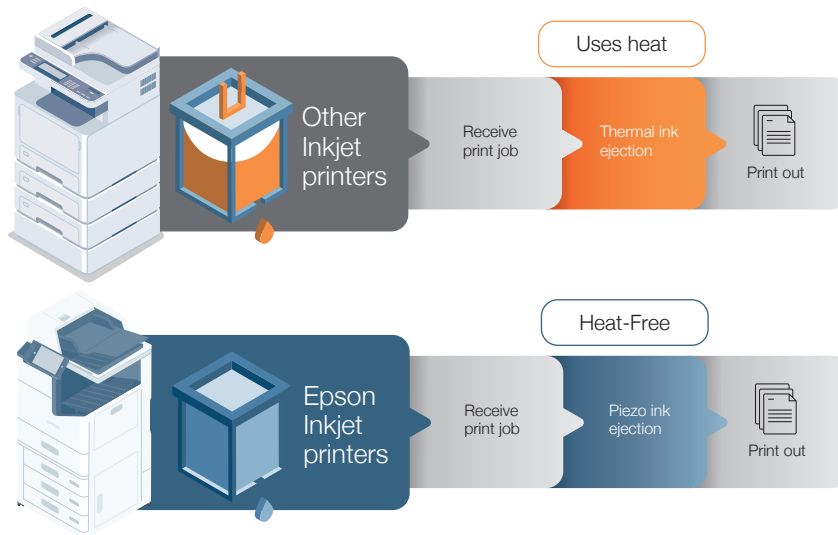

Laser printing process

Typically this is a complex process involving separate stages. It requires preheating the fuser, and again uses heat to fuse the toner to the paper.

Inkjet printing process

This method is comprised of only three stages to achieve a printout.

Why choose Epson genuine ink?

Extend the lifespan of your printer

It's a fact that genuine Epson inks optimise the lifespan of your Epson printers. That's because our inks are designed and tested to fit perfectly with your printers and prevent clogging – extending the operations of your print heads.

Non-Epson compatible inks increase your risk of downtime and repairs, cause premature wear of components and ultimately, result in permanent damage to your printer.

Enjoy more reliability and quality

When it comes to reliability, nothing comes close to genuine Epson inks. Prior to arriving with you, they undergo extensive research and development, are manufactured in high-tech, purpose-built facilities, and are vigorously tested. So they're guaranteed to produce reliable and long-lasting results.

Non-Epson compatible inks mean unacceptable print quality, poor ink longevity that can be prone to tampering when archiving documents, and damage to the professional reputation of your company.

Keep your costs to a minimum

Cost is a critical consideration when choosing your printer inks. By choosing Epson genuine inks, you're reducing potential damage on two fronts – both to your Epson printers and to the bottom line of your business.

Non-Epson compatible inks carry financial implications. Although the low upfront cost can seem appealing, the bills soon add up. From replacing faulty products to printer maintenance; wasted time and resource through reprinting, to replacing unreliable cartridges – and even your printer itself – prematurely, your budget will undoubtedly take a hit.

Visit www.epson.eu/consumables/genuine-inks

High quality, low cost inks

Epson's DURABrite Ultra and DURABrite Pro inks are ISO 11798 certified, producing longer lasting prints in any business environment.

Perfect prints

Enhance your printed materials with high-quality graphics. By doubling the nozzle density, the new PrecisionCore print head produces 600 dpi high-quality printing on plain paper.

Business quality documents

Increased pigment concentration in DURABrite Pro Ink produces brighter colours. As the pigment sits on the surface of the paper, the prints are hardly visible on the reverse side.

More choice

As ink is directly ejected, you can print on a wide range of paper, and because the ink partially penetrates the paper fibres, the ink doesn't fade over time.

Amazingly durable

As the pigment is infused with resin and also insoluble, you can benefit from durable prints resistant to water, smudging and highlighter pens.

Business imaging solutions

Discover how Epson and its partner solutions take advantage of our printers to meet the needs of businesses from SMBs to large enterprises, and can be adapted to suit vertical market needs.

Fleet management

Epson Device Admin (EDA)

Control, analyse and manage your printer fleet centrally from one intuitive interface, designed to increase productivity, reduce costs and ensure maximum security.

Remote Service and Support

Epson Remote Services (ERS)

Epson's cloud-based device monitoring and management system helps your service provider to perform accurate remote diagnosis without compromising on the security. Arm service technicians with the information they need to achieve higher first fix rates and increase your device uptime.

ERS embedded agent

Benefit from the added value of ERS in combination with the embedded agent for a seamless setup and use.

Mobile and cloud printing

Mobile and Cloud printing

Turn your tablet or smartphone into a powerful office assistant. Epson's mobile and cloud printing services allow you to print and scan from your smartphone and tablet - in the office and on the go.

Workflow and security

Epson Print Admin (EPA)

Boost productivity and monitor print usage via a server-based solution that creates a secure printing, scanning and copying environment through user-authentication.

Epson Print Admin Serverless (EPA Serverless)

Seamlessly integrate devices into your security and compliance rules and regulations, without the burden of maintaining a server system.

Document Capture Pro (DCP)

Scan, save and share information easily. Advanced features for naming, separating and routing documents makes scanning simple and logical.

Document Capture Pro Server (DCPS)

For our multi-function devices, with Document Capture Pro Server administrators can manage push scan functions without installing software on individual computers.

Third party integration

Epson Open Platform (EOP)

Gain complete control of your printing operations via a web-based application that enables you to adapt your printer to meet specific and changing business requirements with solutions that help you better manage your printing.

Managed print and service

Keep your business moving with CoverPlus

CoverPlus provides exceptional service and support to give our customers peace of mind. We'll help you choose the printers best suited for your needs and then provide high-quality ongoing support. CoverPlus ensures maximum up-time for your business, helping to protect your investment and allowing you to focus on your business.

- Up to five years' service and on-going support gives you added confidence in your investment
- Service delivery and repair within two working days reduces unforeseen down-time
- Visibility of total cost of ownership minimises unexpected service costs

Take control of your printing expenses with Epson Print Performance

A solution that accurately tracks and cuts printing costs. The pay-per-print includes all supplies, their automatic supply and on-site Epson warranty for the length of your contract.

No unexpected costs, just pay for what you print. No supplies ordering, no additional costs, no hassle — even for decentralised print fleets.
