EPSON®

High performance flexible solutions

For businesses of all sizes, we and our partners have developed a range of software services and solutions to maximise the performance and deliver greatest value from our printers, multifunction printers (MFPs) and document scanners.

With the flexibility to be adapted to the specific needs of a wide range of sectors, the solutions help users improve workflow, control costs, boost efficiency and make integration into ever-changing workplaces easier than ever.

Covering everything from superior security to software development, the range of solutions includes:

Output Management

Document Capture

Mobility

Fleet Management

Open Platform

Increase productivity and control

Our and our partners' output management solutions boost productivity, while creating a secure printing, scanning and copying environment to safeguard company assets.

The solutions protect users' devices against unauthorised use, thanks to user-authentication with card readers, logins, passwords, or PIN codes. They also provide more control over printing costs, with pull-printing capabilities that reduce paper usage from unclaimed printouts.

Epson Print Admin/Serverless

Epson Print Admin (EPA) is a server-based solution that creates a secure printing, scanning and copying environment through user-authentication with card readers, logins/passwords and PIN codes. It also offers additional features such as 'scan and send to me', user education notifications and enhanced administrative tools that provide welcome boosts to productivity, environmental goals and efficiency.

The EPA Serverless advanced solution runs directly on an Epson Workforce Enterprise device and WF-C879R.

Quota Management is supported on the AM-C series with EPA Serverless.

PaperCut MF

Users can extend the power of our MFPs with PaperCutMF – the smarter way to print. This specialist software allows admins to configure their print environment exactly how they want, implementing best practices that can reduce costs, and simplify mobile/BYOD printing.

YSoft SAFEQ

The YSoft SAFEQ workflow platform offers centralized print management and digital workflows to support business growth while solving cost, security, and accountability requirements. SAFEQ's intuitive interface can be deployed on-premises, a private cloud or both through our MFPs.

MyQ

MyQ supports us in our global environmental and sustainability mission. MyQ X is a fully personalised print management solution that respects all user requirements of fast and secure printing, accounting and reporting, as well as advanced scanning, document processing and mobile printing. MyQ X also respects the needs of visually impaired users.

KUARIO

KUARIO enables a webshop mode on your MFP for easy printing, copying & scanning via a QR code. KUARIO takes full responsibility for your users' print credits to relieve you of administrative hassle and offers central management of MFPs via the cloud.

YSoft SAFEQ Managed

YSoft SAFEQ Managed has powerful print management and digital workflow features with a cloud infrastructure managed and supported by Y Soft. Delivered through Epson MFPs, it offers centralised print management, simplified document capture, reduced costs, and increased document security.

Document Capture and Management

Turn physical information into manageable digital content that increases the security of data your business runs on. See the document capture solutions that seamlessly integrate with our devices.

Document Capture Suite

Our Document Capture Suite is a range of easy-to-use scanning solutions for capturing, storing and routing documents around your business and beyond.

Document Capture Pro (DCP) enables individuals to scan, save and share information around the business easily. Advanced features for naming, separating and routing documents makes scanning easy – and logical. Save and send files in common formats and create simple job profiles for one-touch push scanning.

Scan to standard destinations such as email, folder and FTP or upload your scanned documents to popular cloud systems.

Epson ScanSmart

With Epson ScanSmart, users can scan directly from their scanner or from the software. Getting started the software couldn't be easier – users are guided through the process step-by-step, with the option to review scans and rotate, delete, reorder or remove unnecessary pages.

Kofax VRS Elite and Kofax Express (scanners only)

Kofax captures information and automates information-intensive processes, increasing operational efficiency while reducing costs. By enabling organisations to digitally transform their business processes, Kofax improves customer engagement and enhances their competitive advantage.

Laserfiche

Laserfiche is the leading SaaS provider of enterprise content management (ECM) and business process automation. Laserfiche's powerful workflows, e-forms, document management and analytics empower organisations to boost productivity and deliver digital-first customer experiences.

Epson Print Admin – Advanced Workflows

Make use of the Advanced Workflows of Epson Print Admin to increase the productivity of your employees with the ability to easily capture, save and send of scanned documents. The optional Advanced Workflows functions integrated into EPA enable the creation of Searchable PDF, PDF/A in 29 languages, job separation with barcodes, folder and documents naming with Zonal OCR, barcodes, skip blank pages, and much more.
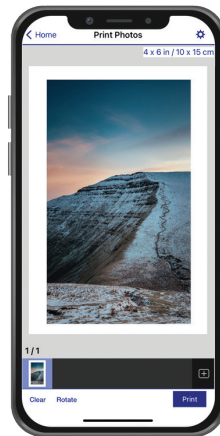

Mobility

Our range of mobile and cloud printing and scanning services mean business users can connect to our devices via their smartphones and tablets, to stay productive whether they're working from home, in the office and on the move.

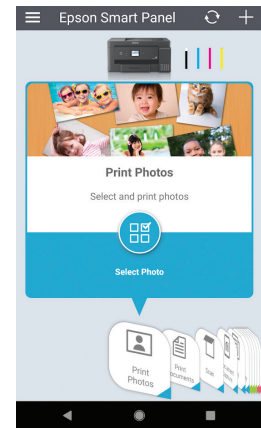

Epson Connect

With Epson Connect, users are never far from the printing and scanning support they need – no matter where they are. Offering a range of wireless services, it means their smartphone and tablet PC is a gateway to the full capabilities of Epson's technology, and always-on working.

Epson iPrint

Users can print anytime to a compatible Epson device from almost anywhere, using their smartphone or tablet with Epson iPrint. The app is free to download and install, offering the instant ability to print web pages, Microsoft Office documents, photos and PDFs – as well as access to scan and copy functionality.

Epson Smart Panel™

Offering an innovative interface, the Epson Smart Panel app transforms iOS® and Android™ devices into mobile control centres for compatible printers and scanners. The customisable app makes it easy to set up, monitor, print and scan with our technology, automatically detecting the printer or scanner being used.

Fleet management

With our fleet management solutions, businesses can stay in control of all of their printers and scanners, with automatically transmitted data helping to save time and money, maximise uptime and maintain productivity.

Epson Device Admin

With Epson Device Admin, managing and monitoring printer and scanner fleets becomes easy. Compatible with a wide range of our networked printers and scanners, it allows users to control everything via one smart and intuitive interface.

Using one uniform tool, businesses can remotely install, configure, monitor, maintain, troubleshoot and secure their printing and imaging. And that means more efficiency, saved time, and better-controlled costs.
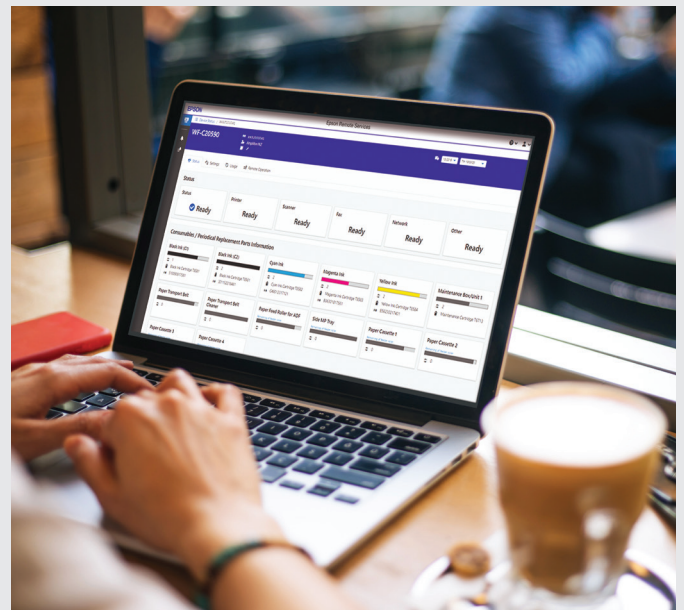

Remote diagnostics

Epson's business imaging technology is renowned for its reliability and consistent performance. With our specialist business imaging services, it becomes even more effective as a business tool.

Epson Remote Service (ERS)

A free, cloud-based monitoring and management system, ERS provides advanced remote diagnostics for our business imaging products. Benefit from reduced service costs using this secure, easy to integrate solution that gives you, as a reseller, the power to remotely access your customers' devices and increase your customers' satisfaction by enabling faster response times, fewer on site visits and higher first-time fix rates.

Engineer resources can also be optimised with fewer service call-outs, while at the same time reducing CO_2 emissions and the environmental impact, by eliminating unnecessary car journeys.

ERS is a cloud-based service that can be accessed from anywhere via a desktop PC, laptop, tablet or smartphone, providing remote monitoring across entire fleets of our business imaging devices, automatic notifications and device-usage analysis, and remote diagnosis and issue resolution.

Epson Open Platform

Epson Open Platform (EOP) unlocks the full potential of our WorkForce Pro business inkjet range, allowing them to integrate easily into web-based enterprise applications and workflows.

EOP is the ideal foundation on which to build your solutions, aligning them with our WorkForce Pro devices and the many advantages they deliver.

EOP makes our revolutionary multi-function printers (MFPs) fully flexible and customisable, enabling them to adapt as business goals and enterprise IT systems evolve.

Give customers complete control of their printing operations, offering flexible solutions that work across entire fleets of our EOP-compatible devices – including customised user interfaces, workflow management and monitoring, and enhanced security.

Epson is one of the most popular multi-functional printer brands. Once you make your solution compatible with EOP-compliant devices, you'll be connected with even more potential customers.
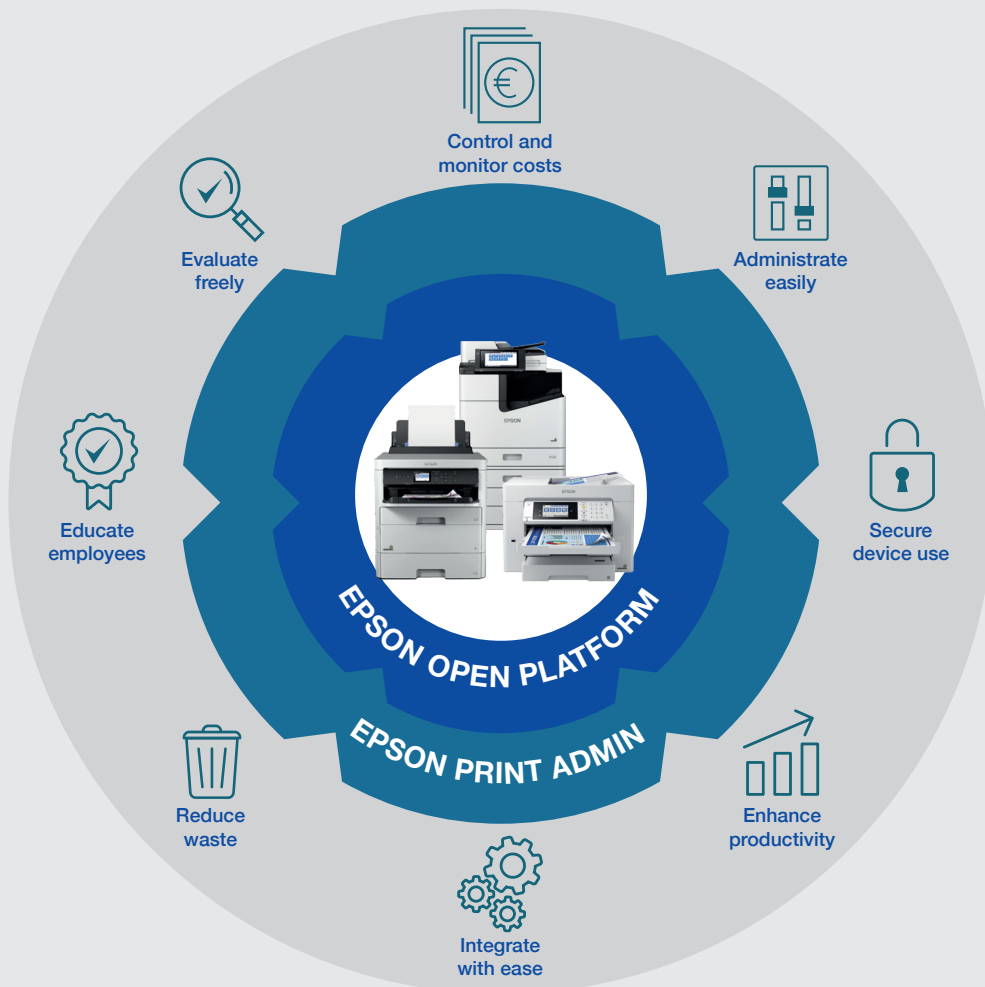

Web-based
EOP uses standard web services technologies, for faster development and seamless integration into customer workflows.

Flexible
EOP makes it easy to integrate our devices into existing workflow systems, providing full control of printing operations and the flexibility to match changing business needs.

Compatible with popular card readers
EOP supports key card reader brands and technologies to adapt to customer requirements. If needed, EOP can be customised for the integration of additional readers and technologies.

Control and monitor costs
