

SureColor T-Series multi-function printers

Precision printing and  
scanning captures  
every detail

**EPSON®**

# Achieve outstanding results with high quality multi-function printing

Epson’s SureColor T-Series multi-function printers take businesses to the next level with secure, large-format printing that delivers outstanding image quality at high speed.

The SureColor T-Series range of five highly versatile multi-function printers, with integrated CIS scanners, combine powerful performance with innovative design. Affordable and simple to use, they are ideal for handling professional, architectural and engineering drawings – even capturing handwritten and highlighted annotations.

Scan and print technical drawings, architectural, blueprints, GIS maps, signage, and posters effortlessly. The large-format graphic capabilities are ideal for retailers, supermarkets, education and municipal planners and GIS.

With their compact design in sizes from 24 to 44-inches, they fit easily into home and small offices with options for large offices and high-volume enterprise-scale printing.

A top-loading integrated CIS scanner, intuitive 4.3-inch colour LCD touchscreen make the SureColor T-Series models straightforward and practical to operate. Automatic data encryption ensures greater data security, whilst Wi-Fi connectivity supports AirPrint, Epson, and third party ISV solutions.

Epson’s PrecisionCore Micro TFP Piezo printhead not only lasts the last lifetime of the printer, but combined with low maintenance and running costs, it creates a consistent high-quality output. All models in the SC-Tx700 and SC-Px500 ranges are manufactured with at least 30% recycled materials and inkjet printing ensures very low energy consumption.

## Flexible, portable print and scan options

The SureColor T3100M, SC-T5100M and SC-T5400M models are designed for a wide range of applications, locations, and budgets. Using Epson’s image stitching adjustment technology ensures high-quality reproduction, even if the original document is creased or crinkled. Documents can be scanned in multiple formats and rapidly sent securely to multiple locations.

**SureColor T3100M**

Compact, lightweight, and portable with a 24-inch print makes the SC-T3100M ideal for smaller businesses. Scan at up to 4.5-inches per second and lengths up to 2.72 metres. Print A1 images in just 34 seconds.

**SureColor T5100M**

A 36-inch printer for larger prints and copies provides a high-quality solution. Print on multiple media with easy switching from roll media to A4 and A3.

**SureColor T5400M**

This large 36-inch printer suits on-site high production volumes with advanced scanning features. Print on matt and glossy media with borderless printing up to A0 and down to a 0.02mm black line width to capture every detail.

# Exceptional quality for enterprise and high-volume printing

The large-format SureColor T5700DM and SC-T7700DM multi-function printers are designed for high productivity with outstanding image quality.

Print and scan using lightweight or heavier media, up to 1.5mm board and canvas with ease. Crinkled and creased originals scanned on SC-Tx700 and SC-Px500 are automatically adjusted to appear flattened. The compact footprint increases installation options while simplified workflow management with remote monitoring puts you firmly in control.

These two MFP models introduce Epson’s new six-colour ink system that delivers high-quality water and smudge-resistant images. A new red ink on the SC-Tx700 models are ideal for highlighting critical elements on construction plans, achieving vivid company logos or producing advertising banners while keeping the cost of printing down. Choose from a selection of ink cartridge sizes from 350ml to 700ml.

**SureColor T5700DM**

This large 36-inch printer makes it ideal for on-site high-production print volumes that include scanning documents up to 30.5 metres in length. Adobe PostScript 3 as standard provides greater compatibility and data is safeguarded with 28 advanced security features. High print speeds deliver A1 in 16 seconds and A0 in 28 seconds.

**SureColor T7700DM**

The largest model in the range has a 44-inch frame with a 36-inch top loading scanning. So, you can easily scan a document up to 30.5m without damaging it under foot, like on a front-loading scanner. It prints two rolls of media without requiring technical interaction and includes all the features of the SC-T5700DM.

Choose the SC-P8500DM if you need photo quality printing complimented with high quality scanning.

# Work more effectively with greater connectivity

All models in the SureColor T-Series multi-function printer range are packed with advanced features designed to make printing and scanning easier, even for people who are used to different working methods.

- Print directly from USB or mobile device
- Scan directly to USB connections, networks, email, memory, and SSD in PDF, JPEG and TIFF formats
- Print and scan securely with automatic encryption
- Wi-Fi connectivity supports AirPrint
- SC-Tx100M, SC-T5400M, SC-Tx700 and SC-Px500 models are compatible with many ISV solutions and Epson productivity solutions

# Expand your output options

The five MFP models in the SureColor T-Series provide an extensive selection of print and scan applications.

- Technical drawings, CAD drawings and architectural blueprints
- Advertising media, including large-size posters and banners
- Sharing data and files quickly and securely
- Archiving and filing documents securely

# Take your print and scan capabilities to new dimensions

### Remove shadows

Reduce wrinkle shadows with the dual low-angle light source that shines evenly to remove most shadowing effects.

### Smooth away document wrinkles and creases

Tackle unwanted wrinkles and creases in documents with Epson's image stitch adjustment technology that re-aligns before scanning to enhance scan quality.

### Display highlighted areas with clarity

Improve colour reproduction of highlighted areas, such as fluorescent yellow markers, using CIS and RGB filters.

### Handle data securely

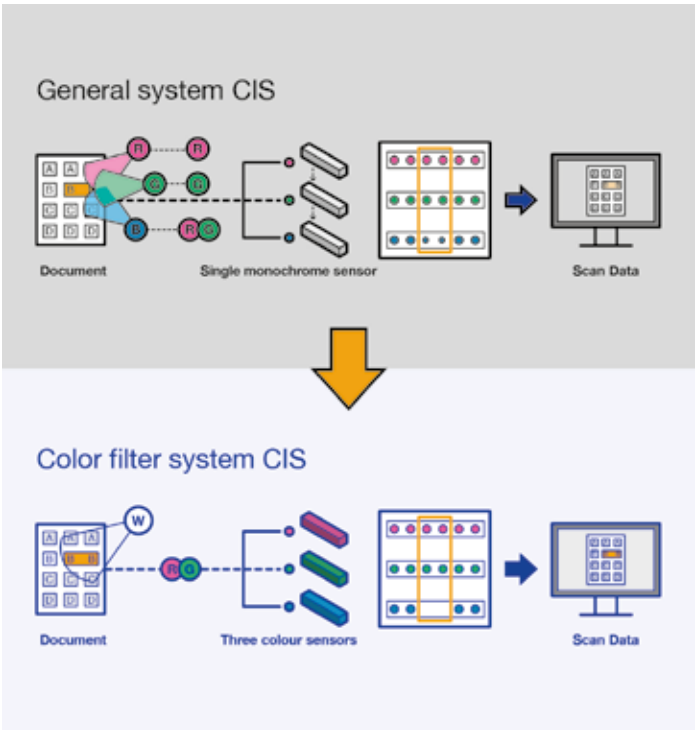

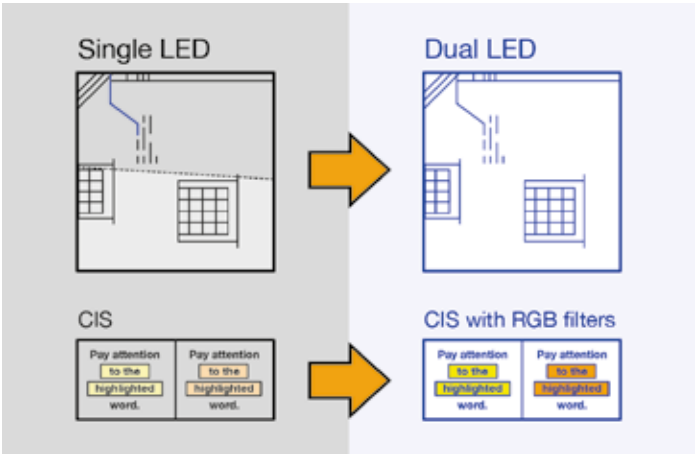

Ensure secure data handling in PDF, JPEG and TIFF formats, including encrypted PDF files.

### Scan complex documents in high quality

The combination of the dual light CIS (with RGB filters) scanner will copy complex documents accurately, and the Adobe PS print engine will replicate the scan precisely, even on complex files with multiple layers.

### Adobe® Embedded Print Engine

Experience PC-Free printing of PDF files from a USB flash drive, phone or tablet—no PC required. Four Intel CPUs on board provide decreased wait times with up to 2x faster processing of complicated data, flawless printing of transparent layers and supported RIP resolution of up to 1200 dpi.

Colour filter system CIS is superior to General system CIS when reading fluorescent colours, especially yellow and orange.

# Specifications

Model		SureColor T3100M		SureColor T5100M		SureColor T5400M	
Technology	All-in-one functions	Print, Scan, Copy					
	Ink type	UltraChrome XD2 Pigment inks					
Scan	Max scan length	2.72m				30.5m	
	Scan speed	Mono 4.5 IPS Colour 1.5 IPS				Mono 7.5 IPS Colour 4.5 IPS	
	Document integration	Mail server, secure mail server, FTP, secure FTP, Network, USB, USB memory device					
	Scan data formats	PDF, PDF/A. Encrypted PDF. (single/multi page). TIFF B&W (2.72m) (single/multi page). JPEG.				PDF, PDF/A. Encrypted PDF. (single/multi page). TIFF B&W (30.5m) (single/multi page). JPEG.	
	Scanner type	CIS - Single LED				CIS - Dual LED	
	Resolution	Up to 600 x 600dpi					
	Print speed (A1)	As fast as 34 seconds		As fast as 31 seconds		As fast as 22 seconds	
Print	Precision quality	0.02mm +/- 0.1%					
	Minimum droplet size	4pl. (with variable droplet size technology)					
	Print resolution	2400 x 1200 dpi					
	Printhead	Lifetime - PrecisionCore MicroTFP Printhead					
	Margins	3mm top, sides, bottom				3mm top, sides, bottom or borderless	
	Paper / Media	Cut sheet (integrated Auto Sheet Feeder)	A5 - A1		A5-A0		A4 - A0
Paper thickness		Roll 0.05mm to 0.21mm Cut sheet 0.12mm to 0.27mm				Roll 0.08mm to 0.3mm Cut sheet 0.08mm to 0.3mm	
Roll specification		2-inch core MAX diameter 110mm / weight 5kg				2/3-inch core MAX 170mm / weight 12kg	
Copy	Copy workflow speed	60 seconds (A1)				44 seconds (A1)	
	Reduction / Enlargement	25% - 400%					
	Default setting	Text/line drawing & image, tracing paper, recycled, blueprint, blueprint inverted, watercolour rendering					
	Max copies	99					
Security		IEEE802, SNMPv3, TLS/SSL, IPSec, Admin mode, WPA3, SMTPs, POPs, FTPs					
General	Memory	1GB + 8GB					
	Dimensions	970 x 680 x 245mm		1268 x 696 x 974mm		1385 x 750 x 1070mm	
	Weight	34kg		45kg		89kg	
	Mobile	Apple AirPrint, Wi-Fi direct					
	Voltage	110v - 240v 50/60hz					
	Compatible OS	MAC OS 10.6.8 or later, Windows 8 or later					
	Interfaces	Wireless LAN 802, USB 3.0, Gigabit ethernet, Wi-Fi direct					
	Auto Media Switching	Yes - as standard					
	Options	Portable stand with basket 24-inch Spindle A1 Document carrier sheet		36-inch Spindle A0 Document carrier sheet			
	Consumables	CMY 26/50ml MK 50/80ml Maintenance Box Cutter unit Self-maintenance kit				CMY- MK 110/350ml Borderless replacement kit Maintenance box Cutter unit	
Software		Epson Printer Driver, Epson Device Admin, Epson Accounting tool				Epson Cloud Solution PORT	
Warranty		1 Year CoverPlus Optional extensions up to 5 years				Minimum 1-year and optional extensions up to 5 years

Software		Epson Print Automate, Epson Print Admin, Epson Device Admin, Epson Cloud Solution PORT					
Warranty		2 years up to 5 years CP packs					

# Why choose SureColor T-Series multi-function printers?

## Flexibility to fit how you work

Designed for home and smaller offices, medium-sized workgroups and large offices. Centralised printing offers reprographics and high-volume production.

## Powerful performance

High output speeds with high-capacity ink options up to 700ml that support large print volumes.

## Outstanding image quality

PrecisionCore MicroTFP printhead lasts the lifetime of the printer, delivering clarity and sharpness with Epson genuine pigment inks.

## Highly secure

Encrypted scanning for greater data security to scan, save and share documents.

## Unobtrusive design

Flat back, front and sides for easy installation, even against walls and cabinets. Use the flat top as a proofing bench.

## Affordable without compromising quality

Competitively priced with comprehensive, extendable CoverPlus that offers up to five years onsite warranty packages for total peace of mind.

## Low maintenance

Keep down maintenance and running costs, minimise downtime and reduce the total cost of ownership.

## Environmentally friendlier

Manufactured using at least 30% recycled materials and inkjet printing for very low energy consumption.
