Epson's vision for Office Printing

The WorkForce Enterprise AM-C series delivers up-to-the-minute printing capabilities for the modern office.

With an innovative compact design, modular configuration and low energy consumption – along with a host of technical innovations – it delivers on all three of Epson's core pillars of printing.

Efficiency

Epson Heat-Free Printing Technology saves energy, reduces consumption and lowers operating costs.

Productivity

With print speeds up to 60 ppm, Epson's Heat-Free Printing Technology means efficient, productive printing.

Reliability

Fewer consumables, less maintenance, reduced downtime and increased ease of use.

Explore the AM-C series

Bridging the speed gap

Where we previously delivered 100 ppm printers, and 20 ppm printers in the low-speed class, the WorkForce Enterprise AM-C series bridges the speed gap with its 40-60 ppm range – addressing a much larger market opportunity.

This means that offices can be part of the movement towards a more sustainable, stress-free and productive workplace.

Consistent, high-speed printing

40 ppm ————— 60 ppm

What sets our technology apart?

Heat-Free Inkjet Technology

Laser printing is complex and uses heat at multiple stages. Ink printing is far more efficient, but usually requires thermal ink ejection. Unlike other inkjet printers, Epson WorkForce Enterprise AM-C printers are entirely heat-free.

Epson Heat-Free printing technology saves on time and energy, while boosting productivity.

PrecisionCore Technology

New PrecisionCore lineheads offer high-speed, high-quality results, for accurate and efficient printing.

Less intervention, fewer replacement parts, and a smaller footprint than laser printers.

Benefits | Compact design

Epson WorkForce AM-C series printers are significantly smaller than conventional models.

C-shaped paper path

Typically, paper takes an S-shaped route, which takes up a lot of space, whereas the new C-shaped paper path is far more space efficient and requires access on one side only.

This means a simpler, shorter path, easier jam removal and finisher connectivity.

Benefits | New ink system

Our new, market-leading ink system offers a number of benefits

Smaller

Easier to service,
faster cleaning cycles

Faster initialisation

Ink cartridges
easy to recycle

Full ink cartridge
contents usage

The WorkForce Enterprise AM-C series printers feature a new hydraulic-head type ink system which is smaller, easier to service, and achieves faster cleaning cycles and initialisation than air pressurisation systems.

The ink cartridge is also fully emptied before disposal and easier to recycle.

Benefits | Stress-free operation

Easier servicing and maintenance, thanks to Epson WorkForce Enterprise AM-C series' innovative design, liquid maintenance box and simpler paper path.

More convenient installation, servicing and handling.

Fleet optimisation tool

Sales support tool to compare actual customers current situation with the Epson solution

- Bespoke view of end users' print fleet
- Efficiency – handling of consumables
- Productivity – time-taken printing hours and potential productivity cost savings
- Energy use – measures energy and CO₂ used
- Report generated automatically

“We have independently verified the data and methodology used for the calculations in this Fleet Optimisation report ”

Epson Solutions Suite

Epson
Solutions Suite

Epson Print Admin

A cost-effective server-based administration tool, Epson Print Admin creates a secure and productive printing, scanning and copying environment through user-authentication.

Epson Print Admin Serverless

Enjoy all the efficiency, security and compliance benefits of seamless administration and user authentication, without the burden of maintaining a server system.

Epson Solutions Suite

Epson
Solutions Suite

Document Capture Pro

Document Capture Pro makes it easy to scan, save and share information, with advanced features to effortlessly name, separate and route documents.

Epson Remote Services

Get advanced remote diagnostics for Epson business products with our cloud-based device monitoring and management system.
