

Office printing solutions for education

Find out how Epson can solve your operational challenges

EPSON®

**Epson
Solutions Suite**

Enhance performance with clever print solutions

At Epson, we understand your unique challenges as IT managers within education settings. From pressure to reduce downtime and boost productivity to the need to do more with less and drive operational efficiency, there's much to consider.

Epson solutions help keep your infrastructure as simple and streamlined as possible, while ensuring your institution has all the printing capabilities it needs to perform at its very best.

Efficient and effective device management

Reliability, monitoring, and simple maintenance

Secure printing operations

Connectivity and compatibility

Scanning and workflows

Budget control and lifetime cost

Epson Solutions Suite

High-performance printing solutions

Challenge

Efficient and effective device management

Managing a fleet of printers – big or small – can put pressure on IT departments working to keep costs to a minimum, boost productivity and reduce energy usage.

You need printers designed for stress-free operation and solutions that make device management and optimisation quick and simple.

What's the Epson advantage?

The Epson Solutions Suite provides comprehensive fleet oversight with centralised monitoring, real-time alerts and streamlined management across all your devices.

Our hardware and software work seamlessly together, reducing IT headaches and making device management simple, user friendly, and less time consuming.

Solution

Streamline device management and boost productivity with Epson

Epson Device Admin (EDA)

Easily manage an entire fleet of networked inkjet printers remotely. With the ability to install, configure, monitor and maintain your devices, Epson Device Admin helps you increase productivity, realise cost savings and gain complete control.

Menu

Challenge

Reliability, monitoring and simple maintenance

When investing in printing solutions, education providers need devices that deliver reliable long-term performance and enable simple, straightforward maintenance. Lack of monitoring tools can cause delays in resolving faults.

Keeping intervention and downtime to a minimum saves time, reduces the frequency of service callouts and improves operational efficiency.

What's the Epson advantage?

Epson office printers are highly dependable. Thanks to our Heat-Free printing technology, there are fewer parts that require regular intervention or that can wear out.

Backed by the Epson Solutions Suite, our hardware works seamlessly with smart software to help you monitor and maintain your print fleet with ease.

Solution

Software that supports reliable performance, monitoring and simple maintenance

Epson Remote Services (ERS)

Benefit from accurate cloud-based device monitoring and diagnostics, while reducing downtime and on-site maintenance with secured remote functions including the Remote Control Panel. This allows authorised users to operate the touch panel from a computer's browser, using the device's Web Config or Remote Web Config on ERS.

Epson Device Admin (EDA)

Manage your print fleet with one centralised solution and monitor issues in real time. See device status, configuration, alerts and supplies - all on a single solution.

Challenge

Secure print operations

Without proper protection, any device on your network can open your institution up to security risks and vulnerabilities.

Whether it's keeping student and employee data private, ensuring your operations are protected from cyberattacks, or simply staying compliant with the latest regulations, you need office printing solutions that deliver peace of mind.

What's the Epson advantage?

As well as our hardware being highly secure and compliant with international standards, the security of Epson devices is enhanced by the Epson Solutions Suite and its advanced security settings.

With the ability to limit user permissions, set up user authentication, and encrypt saved data, you'll have complete control.

Solution

Software that makes security and data protection simple

Pull printing capabilities

With EPA, documents are only printed once the user releases the job at a compatible device. This eliminates the risk of private information being left at a printer, whilst reducing wasted paper, resources and time from unclaimed print.

Epson Print Admin (EPA)

Our server-based admin solution creates a secure printing, scanning and copying environment through user-authentication with card readers, logins/ passwords and PIN codes. It also enables administrators to easily create scan profiles with document capture, OCR processing and delivery to predefined destinations, including cloud storage services that provide welcome boosts to productivity, financial performance and efficiency.

Epson Print Admin Serverless (EPAS)

Our serverless option enables easy administration of the secured print and scan functions by running directly on each device, delivering high levels of flexibility without compromising on security and productivity features.

Challenge

Connectivity and compatibility

Complex tech stacks and challenging integrations add unnecessary time and frustration to IT workflows.

Flexibility is important to ensure print operations are accessible to a wide range of users – including staff and students – while enhanced compatibility can help future proof operations, streamline workflows, and improve lifetime costs.

What's the Epson advantage?

Delivering high levels of flexibility to ensure maximum compatibility with legacy software, existing hardware, and all the latest platforms required, our printers are designed to work around you.

Whatever your setup, there's an opportunity to maximise compatibility and ensure seamless integration.

Solution

Versatile printer options that streamline your existing setup

Flexible connectivity

Epson's office printers come with a wide range of connectivity options, including Wi-Fi, ethernet and USB.

Platform compatibility

Easily synchronise your device fleet with existing IT ecosystems via Epson Open Platform - our integrated solution interacts with embedded software from a variety of independent software vendors to offer enhanced operational control.

Directory services integration

You can seamlessly integrate devices with your local user database or directory services such as Active Directory, Microsoft Entra ID, Google Cloud Directory.

Challenge

Smooth, reliable scanning and workflows

From printing and digitising paper-based documents to managing signatures and student records, schools rely on fast, accurate workflows. When processes are slow, complicated or require too much manual input, they create extra work, increase errors and put extra strain on staff and IT departments.

You need solutions that streamline workflows, enhance accuracy and provide a significant boost to productivity.

What's the Epson advantage?

Epson's fully integrated hardware and software solutions are designed to boost productivity and performance. Controlled via an easy-to-use, personalised interface, they ensure printing, scanning, storing and saving files is fast, accurate and effortless.

Solution

Fast, accurate and streamlined workflows

Epson Print Admin (EPA)

Enhance performance and enable efficient task execution with a personalised user interface that allows administrators to quickly create scan profiles with document capture, OCR processing and delivery to predefined destinations, including cloud storage services. Print directly from the cloud services with no need for drivers and save time and waste with pull printing capabilities.

Document Capture Pro

Simplify scanning with advanced features for naming, routing, and file conversion. Users can easily scan, save, and share files across their organisation, create one-touch scan profiles, and send documents to email, folders, FTP, or cloud services like Microsoft OneDrive and Microsoft SharePoint. Optional DCP Enhanced OCR allows simple conversion of scanned data to Microsoft Excel, Word and other file formats.

Challenge

Budget control and lifetime costs

Education leaders and IT managers are under increasing pressure to do more with less. Untracked costs and outdated infrastructure drive overspending, and software licenses fees can quickly mount up.

You need smart solutions with opportunities to cut costs and complexity from your print operations.

What's the Epson advantage?

As well as offering smart solutions to manage print budgets, we help organisations realise significant long-term cost savings and improved total cost of ownership (TCO) by upgrading their print fleet to Epson's business inkjet range.

Solution

A print environment that gives you complete control

Epson Print Admin (EPA)

Epson Print Admin Serverless (EPAS)

Our easy-to-use print admin software allows you to ensure user authentication before printing to reduce waste, and set quotas to keep print costs to a minimum. You can even manage and track costs by user or department.

With built-in cost-saving rules, such as double-sided printing as default, EPA and EPAS put you in control. Schedule reports to be automatically generated and emailed to you. You can also use the 'out of the box' report offered by EPA or create reports with custom data.

Epson Solutions Suite

Epson business inkjets offer a full suite of advanced printing solutions designed to help organisations easily manage the installation, configuration, and operation of their print environment.

With workflow and security, fleet management, remote services, and third-party integration, Epson Solutions Suite has you covered.

Menu

Hands up for high-performance printing solutions

With Epson's complete printing solutions combining hardware and software, you save time, reduce errors and streamline printing workflows.

Not only do they integrate just as easily as laser printers, but they also offer significant advantages.

[Discover more about Heat-Free printing](#)

Low power consumption saves energy

Heat-Free printing technology lowers the need for power as it doesn't use heat to warm up.

Save time with ready-to-go printing

No heat means no warm-up time when the printer is switched on or woken from sleep. It starts printing immediately.

Fewer parts to replace

Laser printers have drums, transfer belts and fuses that can require periodic replacement. Inkjet printers feature none of these parts, avoiding the need for their replacement.

Less maintenance intervention

The Heat-Free structure of Epson inkjet printers means that there aren't many parts that can wear out, which means less intervention.
