EXCEED YOUR VISION

# INVEST IN THE VERY BEST

## More predictable print costs, less printing interruptions

Ideal for use in bank branches and other customer facing environments, WorkForce Pro printers deliver high-yield ink that needs changing less often – so staff can spend less time replacing supplies, and more time dealing with customer enquiries.

- Improved cost visibility: The high-yield ink supply means longer periods between ink replacements – so print costs are far more predictable.
- High performance: PrecisionCore technology provides the quality of print you expect from Epson, at speeds that never keep staff waiting.
- Enhanced customer interface: With distributed printers, staff can stay with customers while they print documents – saving time, improving efficiency and increasing productivity.

- Greater flexibility: A3 and A4 options available.
- Low IT support costs: The reliability of the WorkForce Pro reduces the strain on IT support, so they spend less time handling queries and troubleshooting.
- Clean and quiet printing: Epson's no-heat technology produces no Ozone gas, and no fan noise during or after printing. Perfect for customer-facing environments.

## Managed Print Services

Take control of your printing costs, with our flexible choice of Print Management Services. From Epson Print and Save, to Epson Print Performance, you can choose the one that suits you – and benefit from on-site warranties, pay-per-use programmes, automatic deliveries and significant discounts.

RIPPS technology uses super-high-yield ink supply reducing the need to stockpile supplies. Available exclusively as part of a managed print service.

## Better organisation, for better banking

Easily capture, share and store documents electronically at the touch of a button, with high speed WorkForce scanning technology from Epson

Most scanners or multi-function printers feature Document Capture Pro Suite software, so you can benefit from Epson advanced document imaging technology for simpler workflow, and easy archiving<sup>3</sup>.

- Organise with ease: Create PDFs within seconds, ready for sharing with colleagues or filing.
- Collaborate and share: Scan documents straight to Microsoft Sharepoint®, FTP or Cloud storage, or any chosen location.

- Integrate into your existing infrastructure: Compatible with a range of Document Management Systems.
- File and categorise: Batch separation capability allows you to scan multiple documents at once, and create separate files for separate filing.
- Search and name: Zonal OCR technology allows you to scan and read specific zones of text for automatic file naming.
- Safeguard your documents: Create password-protected files automatically, for greater customer and staff confidentiality.
