

Selected Epson education projectors achieve TÜV Rheinland Eye Comfort 5-Star Certification

Independently assessed for clear, comfortable viewing

Selected Epson education projectors have achieved TÜV Rheinland Eye Comfort 5-Star Certification, the programme's highest rating, following independent testing against comprehensive visual comfort criteria. Epson are currently the only projector manufacturer with this independent certification*.

TÜV Rheinland Eye Comfort Certification goes beyond individual low blue light and flicker-free certifications, taking a broader view of visual comfort by assessing visual comfort across image quality, visibility, display stability and ambient-light performance.

In education environments, students may view digital content for extended periods, often from different angles and distances across the room. TÜV Rheinland Eye Comfort Certification assesses a range of factors that contribute to a clear, stable and comfortable viewing experience.

Clear, readable images

Readability, brightness, contrast, image uniformity and colour performance are assessed to help ensure text and visuals remain clear and easy to see.

Smooth, stable content

Motion performance is assessed for smooth, stable images with minimal blur and lag, helping reduce visual distractions when viewing moving content.

Low blue light and flicker reduction

Low blue light and flicker-reduction technologies support stable, comfortable viewing, particularly during extended periods of digital content use.

Clarity in changing light

Ambient-light performance is assessed to help ensure images remain clear and colours consistent as lighting conditions change.

Reassurance for education

TÜV Rheinland Eye Comfort Certification gives schools and other education organisations an additional, independently verified consideration when selecting display technology.

By assessing multiple aspects of the viewing experience together – rather than looking at blue light or flicker in isolation – the certification provides a more comprehensive indication of how a display performs for clear, stable and comfortable everyday viewing.

Certified models

The following models are TÜV Rheinland Eye Comfort 5-Star Certified:

EB-L890E, EB-L890U, EB-L895U, EB-L795SE, EB-L790SU, EB-L790U, EB-L690U, EB-L690SU, EB-L695SU, EB-L690SE, EB-L695SE, EB-L270F, EB-L265F, EB-L260F, EB-L210SF, EB-L210SW, EB-L210W.

More Epson projector models may join the certified range in the future, with star ratings reflecting their performance against the certification criteria.

*August 2026.

Certification for selected models only. Star ratings may vary per product series.
