

# A new standard for portable scanning

# Compact, versatile and fast

The DS-310 and DS-360W devices set a new standard for portable document scanning. Delivering a clear productivity advantage for the business person on the move – they are, by far, the fastest portable business scanners in their class available on the market<sup>1</sup>. Boasting USB 3.0 connectivity and a convenient 20-page document feeder, the DS-310 and DS-360W are highly-capable portable document scanners.

## Speed meets quality

The devices put quick and easy scanning right at your fingertips. With mobile scanning speeds benchmarked at an impressive 25ppm\* – for both double and single-sided – and image quality of up to 1200dpi in both colour and monochrome, you'll be ensured efficiency and versatility from start to finish.

## A new standard for portable scanning

Incredibly portable, with the smallest footprint in its class, the DS-310 weighs in at a little over 1kg – so it's small and lightweight enough for you to take with you while travelling, yet powerful enough to manage a wide range of documents quickly and effectively when on the move.

## Cables not required

The DS-360W is built to last in every sense, packed with enough power for even the most demanding business traveller. Not only do its USB 3.0 connections allow you to power up on the go, it also offers a long-lasting battery life and wireless connectivity for a truly cable-free, portable scanning experience.

## Scan efficiently on demand

Auto Scan mode starts a new scanning job as soon as a piece of paper is inserted into the device. This speeds up your rate of document capture ensuring no loss in productivity.

## Digitise your documents wherever you are

Increase productivity while on the move using Epson's intuitive DocumentScan App, allowing you full control of your scanner directly from your smart phone. And with all of the advanced image processing options on offer, you'll achieve consistently uncompromised results in seconds.

## Scan and sync specialist media direct to your phone

A dedicated plastic card slot lets you scan identification cards, driving licences and more. Specialist types of smaller, thicker media can also be captured on the move and synced directly to your smartphone, tablet or computer for easy storage and management.
