

WorkForce DS-530, DS-570W and DS-770

# Intelligent scanning for optimised workflows

# Unlock the full potential of document scanning

The fast and efficient DS-530, DS-570W and DS-770 colour duplex document scanners are the intelligent choice for business document management, offering world-class performance and versatility.

With the ability to scan at up to 45ppm/90ipm, these powerful and compact devices offer a wide range of media handling options that enable you to rapidly capture, index, store and share your business-critical documents.

The scanners can help your business gain control over critical information, improve the quality of your business decisions and increase operational and process efficiency.

Scanning documents direct to a device of your choice offers flexibility for mobile workforces (NFC only available on DS-570W).

## Flexible and versatile media handling

Featuring best-in-class paper feed technology, with slow mode (an industry first), as well as an innovative double feed detection skip function, the ability to scan challenging media has never been easier.

The optional flatbed scanner conversion kit is perfect for scenarios where capturing more specialist media is essential.

## Scanning Capabilities

- Documents as small as a postage stamp<sup>1</sup>
- Paper rolls (up to 6m)
- Thin media (27gsm minimum)
- Thick card (413gsm maximum)
- A3<sup>2</sup>
- Passports<sup>1</sup>
- Books<sup>1</sup>
- Glossy materials
- Bound media<sup>1</sup>

### Exceptional performance for improved productivity

Designed specifically for businesses that handle high quantities of documents, these scanners reduce user intervention by allowing you to capture high volumes of documents quickly; up to 100 sheets at a time using the ADF.

The compact and sleek design keeps the devices' footprint to a minimum

### Performance comparison

Model	Pages Per Minute (PPM)	Impressions Per Minute (IPM)	Automatic Document Feeder (ADF)
DS-530	35	70	50
DS-570W	35	70	50
DS-770	45	90	100

### Dynamic and reliable document integrity

Prevent tedious document double-feeds and ensure every page is scanned thanks to Epson's enhanced built in technology:

1. Active Separation Roller System - automatically separates pages using rollers that change direction before switching back to feed the document
2. Ability to manually set paper length - detects anomalies in paper size
3. Ultrasonic sensors - automatically identifies when two pages are stuck together, allowing you to separate and rescan the pages without having to restart the entire job

The active feeding system starts with an innovative paper tray that helps pages to be scanned more easily. By reducing the friction between the tray and the page to be scanned, it enables media to pass through the device more easily while minimising feed errors.

Double Feed Detection Skip turns off the detection technology at the touch of a button. This means that difficult media – such as envelopes or documents with post-it notes – can be scanned without manually changing software settings.

# Technology for your business

## Flexible connectivity

The DS-530, DS-570W and DS-770 are advanced sheet-fed scanners that deliver a flexible scanning experience perfect for businesses that demand a variety of different connectivity options. They include USB 3.0 and an optional network interface unit, DS-570W also adds Wi-Fi, Wi-Fi Direct and NFC.

## Accelerated information processing

The DS-530, DS-570W and DS-770 scanners feature high-performance, dual-core CPUs with hardware acceleration that ensures high-quality image capture. Image enhancement features include, auto size crop, auto skew correction (hard edge) and colour slip reduction.

## Seamless integration

Epson's intelligent scanning suite (including TWAIN, WIA and ISIS<sup>3</sup> compatibility) allows captured files to be shared instantly – seamlessly connecting with your existing document management systems and cloud repositories.

## Powerful imaging technology

Easily adjust images while scanning, using Epson's image enhancement software with de-skew and auto rotate functions. Advanced features such as barcode recognition and Zonal OCR allow quick document separation and easy file naming.

## Automatic Feed Mode

With Automatic Feed Mode you can scan multiple documents in separate batches and save them as one file.

- (1) - Requires optional flatbed conversion kit (DS-530 and DS-770W only)
- (2) - Scanning of A3 media requires carrier sheet.
- (3) - ISIS drivers are only compatible with DS-530 and DS-770.
