

CUT WASTE, SAVE MONEY AND MANAGE MFP OPERATIONS

EPSON INTEGRATION WITH PAPER CUT MF

Epson's integration with PaperCut MF combines the low running costs, reliability and reduced environmental impact of Epson's devices with the ability to control and manage print volumes to reduce operational expenses.

Using the integrated solution, businesses of any size can manage, account for and recover print, copy, fax and scan output via a user login or card ID. This simple, low-cost software application helps to eliminate waste, encourage responsible printing and make users and departments accountable for print usage.

Epson Open Platform enables the seamless integration of our multifunction printers with web-based enterprise applications – such as PaperCut MF – and workflows. This software turns the printers into scalable devices that meet changing needs as business goals and IT systems evolve.

Epson's integration with PaperCut MF makes it easy to manage your devices, reduce print costs and wastage. The key benefits are explained below:

Integrate with PaperCut MFs

Epson integration with PaperCut MF runs on Windows, Mac and Linux operating systems, and in mixed-fleet environments, meaning it can be integrated into a multi-brand fleet that includes an assortment of A4 and A3 models. Benefit from simplified mobile and Bring Your Own Device printing too.

Monitor and report on usage

Report on print usage by user, department or environmental impact. Access reports from any web browser, or schedule them to be automatically generated and emailed.

Enable 'Find Me' / secure print release

Secure job release with 'Find Me' pull printing, protect confidential documents, and slash the volume of unclaimed printouts.

Cut waste, reduce energy consumption

Encourage responsible printing with PaperCut MF quotas and print policies, cutting paper and supplies costs, and power usage. Make use of at-a-glance reporting on emissions that demonstrate your reduced environmental impact.

Receive a fast return on investment

ROI is an important consideration in most network technology procurement procedures. Discover how reductions in printing and copy volumes, and colour usage will yield proven savings.

Administer centrally, manage easily

Allocate printing quotas and budgets to specific departments, cost-centres and users with shared accounts. You can also see how many pages are being printed by whom, at what device and when.

Apply your own print policies

Allocate printing to specific departments, cost-centres and users with shared accounts. Apply the print policies that will achieve your goals as your IT systems evolve.

EPSON OPEN PLATFORM

Enhance the potential of our business inkjets and multifunction devices and adapt them to suit your individual needs with Epson Open Platform. The software unlocks their potential by adapting them to meet your specific and changing needs as your business goals and enterprise IT systems evolve.

EOP-compatible hardware

WF-R5690DTWF

Predictable costs with minimal intervention

WF-M5690DWF

Fast, low-energy mono printing

WF-5690DWF

Ecological and low-cost A4 multifunction

WF-6590 Series

Low-intervention printing

WF-8590DWF

Ecological and low-TCO A3+ multifunction

WF-R8590DTWF

Super high-yield printing up to A3+ with predictable print costs

WF-8590D3TWFC

Ecological and low-TCO A3+ multifunction printing

WF-R8590D3TWFC

High capacity, ecological and low-TCO A3+ multifunction printing
