

Epson projector solutions

The future of retail display

EPSON[®]
EXCEED YOUR VISION

Make an impact with projection mapping

Stunning visuals are something that people remember forever. From fireworks displays to dramatic movie scenes or striking artwork, strong imagery can completely change a person's perception.

Make your business a more spectacular place to be with the Epson projector range. Capable of projecting up to 4K quality images onto any surface or shape, in a wide range of lighting conditions, they transform your business into an interactive canvas.

With Epson you're guaranteed an unbeatable solution. Our commitment to product quality, technology, relationships and service and support is the reason we've been the market leader for projectors for over 17 years.

Captivate your customers

Whether you run a small boutique shop or a chain of hotels, making your space inviting for patrons can boost customer experience, improve your reputation and earnings.

Projectors can be a simple way to make your environment more captivating. For example, in a hotel or guest house, they can be used to highlight the path to a room or leave a welcome message on the door for guests.

Epson projectors open up new ways of thinking about displaying information. Unlike traditional signage, projectors can personalise the experience for every visitor. In a coffee shop, for instance, a projector can illuminate individual beverages on the countertop with graphics and details, so customers can distinguish their cappuccino from their friend's latte.

Impress with bright, flexible HD projection

Have you ever looked at an open-air rock concert, where the buildings become a part of the set, moving and changing to match the action on stage, and wonder how they do that?

Projection mapping is the answer. Using a powerful Epson laser projector, you can map walls, products or entire buildings. Use it to make an environment more exciting, or couple it with motion tracking technology to turn any surface into a touchscreen, making every restaurant table an interactive menu, the only limit is your creativity.

For large exhibitions and displays, multiple projectors can seamlessly blend together, so any surface is completely covered, regardless of the shape or size, while discreet laser projectors can easily highlight a single item or wall.

Create stunning displays and immersive environments

Upgrade your advertising with Epson projectors for a more interactive, adaptable and engaging experience. Use them to complement printed collateral, or use them for eye-catching standalone advertising.

An Epson projector offers bright, HD quality imagery and deep colour clarity, meaning you can display any captivating image or advert you choose, in any lighting conditions, without the costs and delays of printing adverts. You can even use smart technology to make adverts or signage interactive, surprising and delighting your customers.

What's more, the projectors are flexible enough to fit any space requirements. Ultra-short-throw projectors can be placed into even the tightest of shop windows without compromising the result.

Which projector is right for you?

Epson LightScene EV-100

Discreetly advertise on any surface

State-of-the-art fit-and-forget laser projector

Small, light and unobtrusive

Can be mounted anywhere and project onto any surface

Setting the highest standards

Epson understands that projectors can be a significant investment for businesses, which is why every effort is taken to ensure your product exceeds your expectations. From advanced technology to enhanced cover and warranties, you're getting the maximum value for money with Epson.

Leading the class

Epson are world leaders in projectors, thanks to the smart technology, such as 3LCD, along with bulb and laser technology that is 3x brighter than rivals. Not to mention the exceptional reliability you are guaranteed with an Epson product.

Adapt to anything

Epson projectors can be equipped with a range of accessories to ensure it can fulfil any task flawlessly. From heavy-duty mounts to lenses that can optimise the projector for any environment, your needs can, and will, be met.

Comprehensive support

Your peace of mind is a key goal, so as well as building rugged products that last, Epson will give you a range of service and support options that cover your projectors, so you never have any reason to worry. You can even opt for a CoverPlus package, which extends your warranty to up to five years, to maximise your peace of mind.

¹ Survey conducted by Futuresource Consulting Limited for the period from 2001 to 2016 period from 2001 to 2016

² Colour brightness (colour light output) in brightest mode, measured by a third-party lab in accordance with IDMS 15.4. Colour brightness will vary depending on usage conditions. Top-selling Epson 3LCD projectors versus top-selling 1-chip DLP projectors based on PMA Research sales data for Dec.2015 through Nov.2016.
