EPSON®

EXCEED YOUR VISION

Hassle free presentations

Take advantage of our specialist software solutions and benefit from increased capabilities, confidence and control. Present the way you want, where you want, easily and effectively.

We realise inspiring presentations and innovative solutions go hand in hand — which is why we have developed a dynamic portfolio of advanced display solutions tools. Whether you're managing multiple projectors, want to deliver more dynamic presentations or are looking to create stunning displays, our solutions optimise productivity and give you the power to deliver your best images and ideas.

Discover just how much more flexible your current Epson display solution could be — visit www.epson.co.uk/projector-software

Wirelessly stream and share

Epson iProjection App

Epson iProjection is an intuitive wireless projection software and app for Window/Mac, iOS, Android and Chromebook devices - available to download for free.

This makes it easy to wirelessly present documents*, images and web pages from your smart devices using any Epson projector with Network Projection capability.

The built-in annotation button enables you to use a pen, highlighter or eraser, with colour and opacity options, and to highlight and write notes over the projected image in real-time viewing.**
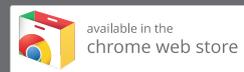

* Supports cloud storage services such as Dropbox

**Only available on iProjection iOS / Android

Epson iProjection for Chromebook

Effortlessly share content wirelessly from Chromebooks to a dedicated projector. Display content from a single Chromebook or use with iProjection with moderator function, where you can select and display content from up to four Chromebooks at one time.*

* File support varies depending on device operating system

Download on the App Store | **GET IT ON Google play** | available in the **chrome web store**

Screen Mirroring (Miracast)*

Wirelessly cast from selected smartphones, tablets and PCs that support screen mirroring. Designed and built upon Wi-Fi Direct, a technology that enables two devices to form a direct, peer-to-peer Wi-Fi connection to screen mirror, this software allows you to display content such as photos and videos from your device without cables or a network connection.

*Selected models

Complementary hardware

Wireless LAN adaptor

The high-speed, wireless network adaptor allows you to connect to selected Epson projectors, allowing quick and easy access to the LAN or peer-to-peer networks without wires or cables. When used with Epson Projector Management and iProjection you can remotely access and control projectors over the wireless LAN.

Monitoring and control

Epson Professional Projector Tool

Our free software (EPPT) makes it quick and easy to create eye-catching displays, allowing for easy alignment of up to 50 projectors with geometrical adjustment and edge blending.
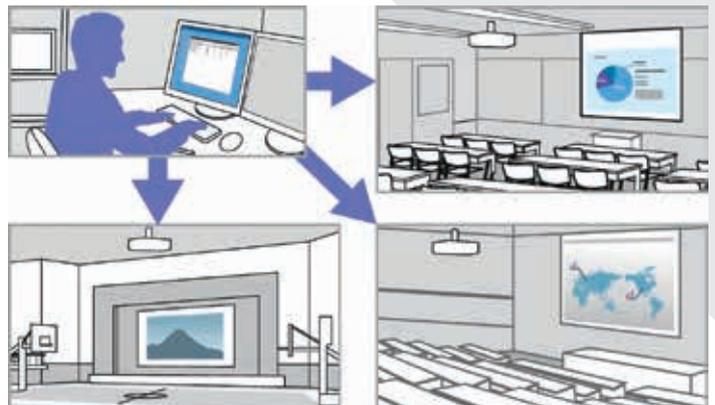

Epson Projector Management Software

Our free to download centralised management utility, gives IT, facilities and network managers the ability to efficiently monitor, control and manage their display solution fleet through a clean and clutter free management console. The software is also compatible with PJLink certified devices.

Operation status, error reporting and input source switching are just a few of the functions.

The software also incorporates a message broadcast feature that allows administrators to send messages or announcements in text or JPEG formats to one, several, or all the projectors on the network. The message can be sent manually, or set to distribute at a specific time.

With the scheduling feature, this software takes the pain out of tasks such as powering down all the projectors in a building after working hours, and error monitoring to ensure display solutions in all meeting and learning spaces are fully functioning to avoid delays and downtime.

Interactivity and collaboration

Easy Interactive Tools*

Our annotation software lets you use your interactive pen or finger as a mouse to navigate, select, scroll, draw, save, and interact with projected content from your computer.

There are two modes to chose from:

Interactive mode displays the toolbar on the projected image and lets you use the pen as a mouse to open applications, access links, and operate scroll bars, for example. You can also annotate over anything that is displayed from your computer.

Whiteboard mode turns your display area into a digital drawing canvas. There are three solid colours and six patterns available for the background. The toolbar gives you the essentials to write, draw, insert shapes and images on the background. You can also import images from your Epson document camera.

* For use only with Epson interactive projectors

Content management

Epson Projector Content Manager software

Epson Projector Content Manager software allows you to add images and videos to playlists, and save them on an external storage device (SD card or USB drive). Inserting the storage device into the projector, you can easily project your playlist content without using a cable connection, plus add custom shape filters, overlay effects and scheduling."

*Available on selected models only

Find the ideal display set up

Display Size Calculator

Work out the ideal Screen Display size for your projector display solution based on room dimensions, layout and number of seats.

www.epson.co.uk/display-size-matters

Display TCO Calculator

Use our "Smart Cost Saving" Total Cost of Ownership calculator comparison tool to show how much you can save on running costs by switching to Epson display solutions versus conventional competitor flat panel and projector brands.

You can also configure the calculator to work out how much you could save by utilising some of the ECO features that come standard with our display solutions.

www.epson.eu/display-tco-calculator

Throw Distance Calculator

Easily work out image sizes and projection distance dimensions across our entire projector range. Simply select your desired screen size or the projection distance, and the smart online tool will automatically calculate all the necessary installation dimensions.

www.epson.eu/distancecalculator

Lens Distance Calculator

We have created a comprehensive calculator for our fixed and interchangeable lens projectors, allowing you to determine the throw distance based on your chosen screen size, or vice versa.

Software solutions

Function	Epson software solution	Short description
Wirelessly stream and present	**iProjection software for PC / Mac**	Wireless screen mirroring solution that utilises the built-in Wi-Fi connection of the presenter's device meaning there is no need for any 3rd party device such as Apple TV to send content to the projector. Up to 50 devices can be connected to the same projector and up to 4 can present their content at the same time. The built-in moderator mode allows one user to take control of incoming content from the connected devices.
	iProjection App for iOS / Android	Feature-rich BYOD solution for smartphone and tablets, allows the users to project content, annotate and even control the projector, all directly from their devices. There is also a multi device mode for group collaboration. The built-in moderator mode allows one user to take control of incoming content from the connected devices.
	iProjection App for Chromebooks	Supports fully mirrored display of all your Chromebook content including Google Docs, Slides, Sheets and Chrome browser.
	Screen Mirroring (Miracast)	Industry-wide screen mirroring solutions that enable screen mirroring from compatible smartphones, tablets and PCs using a peer-to-peer connection.
Complementary hardware	**Wireless LAN Adapter**	High-speed Wi-Fi adaptor for wireless connectivity to Epson display solutions.
Monitoring and control	**Epson Projector Management**	Check the status of multiple networked projectors and perform various projector operations from a management control panel.
	Epson Professional Projector Tool	Simplify multi-projector installations with intuitive geometry corrections such as edge-blending and adjustment for curved surfaces, plus colour-matching and brightness controls.
Interactivity and collaboration	**Easy Interactive Tools**	Gives you annotation and drawing capability on projected images or a plain background. You can also perform simple control of your document camera and projector.
Content management	**Epson Projector Content Manager**	Add images and movies to playlists and save them on an external storage device that can be inserted in the projector for simple, cable-free presenting.
Utilities	**Throw Distance Calculator**	An easy-to-use, on-line tool to help you gauge the image size and projection distance dimensions for all Epson projectors.
	Display Size Calculator	Work out the ideal display size for your room based on room dimensions, layout and number of seats.
	Lens Distance Calculator	Calculate the screen size or throw distance, based on your projector and lens selection. Also includes some fixed lens projectors.
	Display TCO Calculator	"Smart Cost Saving" Total Cost of Ownership calculator comparison tool to show how much you can save on running costs by switching to Epson display solutions versus conventional competitor flat panel and projector brands.

Some software solutions maybe restricted to selected models only. Please refer to product specifications.
