A close-up photograph of an electrical control panel. At the top, there is a label that reads "OFF" followed by a left-pointing arrow and a right-pointing arrow. Below this, there are two more labels, one with the number "2" and one with the number "4". The panel is partially obscured by a white diagonal graphic element that covers the right side of the image.

## Designed for electrical environments

Using the right labels for electrical components and wiring ensures easy identification and communicates a job well done.

That's why Epson tapes have been specifically designed for electrical applications to provide a tough, fast and reliable solution. With strong adhesion, high flexibility and resistance to abrasion and UV, Epson tapes are made to perform.

# Discover the benefits

Epson has unrivalled experience in electrical labelling to ensure our products produce long-lasting results with a low TCO, thanks to longer tapes and less wastage.

Get the job done quickly with products that are easy to operate and print at high speed.

Epson labels can be used for all electrical equipment, furniture and usages, including:

- Cables
- Consumer units
- 3 phase boards
- Circuits
- RCD testing
- Supplies
- Inspections
- Earthing and bonding
- Warnings

# Label makers for all applications

With a wide range of label makers designed for printing on the move, on-site or connected to a printer in the back office, Epson address every electrical labelling need. With Epson's easy-to-use software and mobile DataCom app, producing labels for your electrical projects has never been easier.

Affordable and efficient, all models incorporate high print speeds and easy-to-use functionality. Whether you need to identify the associated circuit for a socket, cable, switch or other hardwired part, label circuit boards and MCBs or identify cables, Epson has it covered.
