Epson iProjection App

Wireless display solution

The Epson iProjection App is the wireless display solution for classrooms, boardrooms and workspaces using bring your own devices (BYOD). With true multi-platform support, users can wirelessly display content from PC, macOS®, iOS®, Android™ and Chromebook™ devices[1].

Plus, with the built-in moderator function[2], that allows a teacher or moderator to control what can be displayed and when, it's the perfect tool for sharing a variety of content - or for comparing work side by side.

Display and annotate

Browser content

Documents

PDFs

Photos etc

Advanced functionality[3]

Two-way content sharing - push content from the projector to connected devices

Real-time mobile camera display - use your device's camera like a document camera or web cam

Device management

Wirelessly connect and manage up to 50 devices simultaneously

Display content from up to four devices at a time on the screen

Chromebook support[2]

Screen Mirroring capabilities

Display content from Google Docs™, Google Slides and Google Sheets™

Display web content from a Chrome™ browser
