Superior technology
Sensational quality

EPSON®

EXCEED YOUR VISION

Innovation and quality, for stunning results

In photography, fine art, and professional printing and proofing, there is a high demand for large format printing, and an expectation for productivity that does not come at the cost of print quality.

We believe the solution is an easy-to-use large format printer suitable for non-specialists and trained professionals alike. Our SureColor P-Series features a broad range of large format printers - each one designed to meet high volume, exceptional quality and short lead times across a variety of applications.

Now you can achieve:

– Maximum efficiency through all stages of print production

– Minimal maintenance and ease of operation enabled by intuitive design

– Uncompromising performance that balances productivity and quality

– High quality precision for colour-critical print jobs

The accuracy and quality of the output is further enhanced by the deepest blacks and an expanded blue colour gamut, to reproduce ultra-realist prints. All this forms part of Epson's complete printing solution of hardware, software, inks and paper.

Picture perfect photography

In a profession where every detail counts, choosing the right printer is essential. Whether you're a semi-professional or professional photographer, you need the highest quality printer possible for uncompromising, vibrant results – every time.

Semi-professional photography

Photography may not necessarily be your primary profession, but we know that achieving high quality results is no less important to you than a full-timer. You need more from your desktop printing – at the same time as saving money and space.

Our SureColor P-Series range ensures every detail of every image is captured with exceptionally precise dot placement and small droplet sizes – made possible by advanced printhead technology. You can benefit from the smooth gradations and accurate texture reproduction. Or produce large prints in smaller studios, with the space-saving designs of the SureColor SC-P700 and SureColor SC-P900.

Professional photography

A wide colour range and the flexibility to print in a variety of sizes is key to meeting the diverse requirements of full-time photography. As a professional, you make a living from the excellence of your work – so you need to focus on quality.

Our range makes it easy to produce professional-quality prints. The SureColor SC-P7500, for example, enables you to print striking, dramatic colours thanks to the high black density, and an exceptionally wide colour gamut. The range also prints on a wide variety of media – including glossy paper, matte paper, photo paper, canvas and thick media.

for the **adventurer**

SureColor SC-P700 / SC-P900

– A3+/A2+ printing
– Integrated roll function on 13" and optional on 17"
– Illuminated print path
– 4.3" optical touch LCD-panel
– Stylish design with a small footprint
– Black inks (PK/MK) are always available, so there's no need to switch between matte black and photo black

SureColor SC-P5000

– Compact with a small footprint
– Light Light Black ink delivers the smoothest gradations with brilliant, accurate colours
– Ideal for creating long-lasting professional photographs

SureColor SC-P6000 / SC-P8000

– Produce images up to 44"
– UltraChrome HD inkset for optimum results
– Ability to print directly onto 1.5mm thick posterboard

SureColor SC-P7000 / SC-P9000

– Creative art in midsize format, optimised for enhanced productivity
– Impressive colour prints with an outstanding colour gamut, and impressive black and white prints with four black inks
– Unrivalled performance with state of the art technologies coupled with an easy to use interface

SureColor SC-P7500 / SC-P9500

– Available in 24" or 44"
– 4.3" LCD optical touch screen
– 12-channel printhead for high productivity
– Up to 99% Pantone coverage[1]
– Black inks (PK/MK) are always available, so there's no need to switch between matte black and photo black

SureColor SC-P20000

– Produce true large-format photographs on fine art media with more precision, speed and tonal gradation
– K4 ink set helps to achieve excellent lightfastness, vivid, stable colours, and intense saturation
– Enhance productivity with the 2.64" PrecisionCore printhead and newly-developed paper-feed mechanism

Exhibition-worthy fine art

A large format printer that can maintain superior quality on a wide variety of mediums can make the difference between simple prints and magnificent art.

Quality without compromise

Quality may be the most important thing, but it shouldn't come at the cost of speed. Whether you run a small gallery space or a large museum, Epson large format printers achieve the best of both worlds for all your print requirements.

The SureColor SC-P900 onwards boasts the very latest colour measurement, checking and correction technologies so you can be assured of striking, vivid colour from every print.

Unrivalled precision

When fine art is exhibited, it is open for inspection. The SureColor P-Series range can mean the difference between inspection and admiration.

Through its delivery of exceptionally high dot placement and small droplet sizes from advanced printhead technology, our range recreates your vision in perfect detail – and using durable resin-coated ink, prints last longer.

Art that goes further

Real art isn't limited by its medium. That's why the series supports printing on a wide range of media.

Focus on your craft with easy set up and operation with prints of up to 64" and quick media feeding – whether that's matte media, fine art paper, photo paper, canvas and more.

for the **critic**

SureColor SC-P900

– Creative art in small format, as well as banner printing

– High density blacks for impressive greyscale production

– Support for wide range of fine art media

SureColor SC-P6000 / SC-P8000

– Creative art in large format

– Impressive results coupled with wide colour gamut

– Magnificent image quality repeated time and again

SureColor SC-P7000 / SC-P9000

– PrecisionCore printhead ensures consistent results and high-quality, reliable output

– High-capacity ink cartridges enable longer print runs between cartridge replacements

– Delivers highly accurate colours with up to 99% Pantone colours[1]

SureColor SC-P20000

– Creative art in midsize format with high productivity

– Impressive results with outstanding colour gamut, and black and white with four black inks

– Unrivalled performance with state of the art technologies coupled with ease of use

High-impact print production

Getting the most out of a large format printer in a demanding print production setting requires consistent prints that are easy and quick to produce.

for the **demanding**

SureColor SC-P7500 / SC-P9500

– High productivity with unparalleled image quality

– Epson's first-ever 12-colour printer

– Wide substrate usage up to 44" for any on-demand jobs

SureColor SC-P20000

– Ultimate performance with the latest technologies

– Our smoothest and fastest printer for all demanding applications

– Wide substrate usage up to 64" for any on-demand jobs

More from every print

The core technologies of the SureColor P-Series series mean every print run is operationally efficient and produces outstanding prints, even on high print settings.

High precision media feed and self-cleaning technology enables continuous productivity that doesn't suffer from unnecessary disruptions.

The SC-P7500 and SC-P9500 internal ink buffer and sub-tank system enables you to change ink cartridges as soon as the current print job finishes.

PrecisionCore Micro TFP printhead

Our top of the range printers feature Epson's PrecisionCore printhead technology.

For each colour, the PrecisionCore Micro TFP printhead has 800 nozzles, delivering perfectly accurate colours and ink dots with virtually no misting or satellites.

Our printers are extensively tested and scientifically formulated for ink durability and water resistance.

Dedicated to waste reduction

In a high production environment, even incremental waste has a significant effect on cost and time. The SureColor P-Series series has been designed for efficiency to curb print waste.

The optional local Hard Disk Drive (HDD) on the SureColor SC-P9500 and SureColor SC-P20000 means printers can perform a test print, check for quality, and confirm the entire print run directly at the printer – saving waste of a large print run that doesn't meet expectations.

Next-level proofing and design

Professional proofs and prints are held to an incredibly high standard. The expectation is for accurate colour reproduction and fast turnaround times on impactful large format prints.

Fast precision printing

Achieving the perfect print shouldn't put a strain on your productivity. The range boasts an innovative precise paper feed mechanism, which offers superior quality, speed, and ease of use to make every print a streamlined process.

With a PrecisionCore printhead and paper feed mechanism, you can be assured that every proof and print is delivered with precision that doesn't cost productivity.

Intuitive operation

Maintenance, especially when unplanned, can have a significant cost on the printing and proofing process. That's why our large format printers include a number of intelligent features that increase operational uptime in your business.

Superior colour accuracy

Accurate colour reproduction, high-density ink and precise dot placement are essential for a vivid finished print that brings an image to life.

For packaging and contract proofers for whom precision matters, Epson has raised the industry standard for proofing. With colour measurement, checking and correction technologies, users can work with more efficiency and greater confidence. An optional SpectroProofer with photospectrometer leads to faster and more accurate colour measurement and the in-line proofing colour control is fully automated. In short, results are unerringly predictable.

for the **perfectionist**

SureColor SC-P5000

– Achieve near-perfect colour matching with 99% Pantone® colour coverage; the best choice for a fast proofing workflow (Violet ink model)

– Stunningly accurate prints with unfading quality

– Optional SpectroProofer for predictable results with inline colour measurement

SureColor SC-P7000 / SC-P9000

– Best fit for all types of standard proofing needs

– Repeatable, constant and accurate results with 99% Pantone® colour coverage

– UltraChrome® HD ink with very short colour stability for fast turnaround

– Optional SpectroProofer

SureColor SC-P7500 / SC-P9500

– The industry standard for proofing with 99% Pantone® colour coverage

– Supported by all major workflow solutions

– Optional SpectroProofer for predictable results with inline colour measurement
Core technologies

For superior results, Epson continuously strives to better the core technologies in our printers. The SureColor P-Series range is no exception – and uses many of our market-leading innovations to deliver accurate results, vivid colours and consistent quality.

Accurate results

Epson's SureColor P-Series printheads use up to 800 nozzles for each colour, to produce perfectly accurate dot shapes, and virtually eliminate misting and satellites. At the heart of the range, this technology improves printing speeds to increase productivity for the perfect print every time.

The addition of Epson's UltraChrome® range of inks widens the SureColor P-Series series' colour gamut – extending it up to an impressive 99% PANTONE® coverage for the most accurate colours on the market[2].

Exceptionally wide colour gamut and the highest black density on the market

PRECISION**CORE**

Vivid colours

The high quality of ink used in all SureColor professional printers evens out the difference in glossiness among colours and bronzing reduction significantly lowers graininess that can appear on skin tones.

The Epson Colour Calibration Utility performs colour correction when time or other factors make colour changes necessary. An optional PhotoSpectrometer leads to faster and more accurate colour measurement, as well as reducing print time and paper waste. Finally, by adding a Spectroproofer, inline proofing colour control is automated, eliminating the need for a professional operator.

Optional Spectroproofer powered with X-Rite PhotoSpectrometer

Consistent quality

Photography and fine art will retain its high quality for around 60 years[3] on premium glossy photo paper. This lease of life comes from an increased grain diameter in the yellow ink – the colour most vulnerable to UV damage.

And to improve ink efficiency in the SureColor P-Series series, our Look-Up Table (LUT) technology seamlessly integrates hi-fidelity ink primaries for a smooth transition between colours – so prints look exactly the same in any light.
