HIGH QUALITY AND ECONOMICAL

A Compact, affordable and flexible commercial photo production inkjet printer.

The SureLab D700 is ideal for professional photographers, photo shops, copy shops and event photographers looking to print high-quality photos and expand their existing photo print offering with square sized photos, cards, calendars and much more.

It offers:

- Outstanding flexibility with media support from lustre and glossy to paper-based matte
- Natural skin tone reproduction and high dynamic range for highlight and shadow details and deep blacks with 6-colour UltraChrome D6-S inks

FEATURES

The SureLab D700 adds versatility and value to commercial photo printing.

- Easy to transport, with a compact design.
- Low cost per print
- Prints up to 360 standard quality 15cm x 10cm prints per hour
- Easy to integrate into almost any workflow thanks to its Mac/Windows printer driver
- Variable print length from 8.9cm to 100cm and widths from 10cm to 21cm
- High print quality with crisp, sharp images based on our Micro Piezo technology and Epson's image processing technology

Post-print heater for stable colour reproduction and instant drying

Auto cutter for full flexibility in print formats

Paper dust removal system

Robust paper transportation system

YOUR ONE STOP SHOP

A scalable inkjet microlab that provides the format and media flexibility to suit your customers' needs.

The SureLab D7 Studio is controlled by an order terminal with a 22 inch multi-touch screen and includes two DL-D700 printers that fit inside the cabinet. Whether you use it as a self-service or behind-the-counter operation, the SureLab D7 studio offers flexibility and productivity, ideal for large scale independent photo stores, theme parks and copy shops.

Scalable and productive

- Up to three extension cabinets with one or two printers inside can be added to the basic microlab
- It's designed to produce greeting cards, concertina folded photo collages, menus, flyers, and other mixed print jobs

PRINTING THAT MEANS BUSINESS

A Minilab for high-quality photo print production.

Designed for high-quality print production, the SL-D3000 gives users the flexibility to produce a variety of media from 9cm x 13cm up to 31x122cm (A3+ width) on glossy, lustre and matte media.

The SL-D3000 offers:

- The highest productivity in the SureLab product range
- Optional 10 tray A4-sorter with its long print ejection unit for high productivity and ease-of-use
- Dual-roll model allows two different media types to be loaded at the same time.

SL-D3000 (DR/SR) FEATURES

- Highest print resolution in the SureLab range.
- Excellent productivity with 100m rolls, 650 15cm x 10cm prints per hour, 700ml ink cartridges (more than 25,000 15cm x 10cm prints per set) and on-the-fly ink changing
- Load 2 x 100m rolls of different width sizes and type
- The Backprint application allows for easy reprints and unattended prints runs.
- Flexible media options include lengths from 3.5 inch/89mm to 48 inch/1.20m on rolls of 10cm, 13cm, 15cm, 20.3cm, 21cm, 25.4cm and 30.5cm
- Long printer lifecycle of 2.7 million 15x10 prints
- Small footprint for easy placement and storage
- Expand your system with options including A4 10-tray Sorter, Spindles, Long Print Stacker, OrderController and Layout and ID

EPSON®

SURELAB TECHNOLOGY

Consistency in print quality production

- Permanent printhead for high precision printing
- Epson variable-sized droplet technology to increase speed and quality
- Truly circular nozzles for perfectly shaped dots that result in clearly defined and sharp images

Superior image quality

- Epson's acclaimed Micro Piezo printhead technology ensures quality and precision
- Consistent, reproducible results
- Professional UltraChrome D6/D6-S ink for high-gloss, a wide colour gamut and longevity on dedicated media
- Superior image processing technology for natural colour reproduction, minimised graininess and colour inconsistency, based on over 40 years experience in imaging industry

Reliability and cost efficiency

- High durability print engine minimises periodical maintenance requirements
- Environmentally friendly ink cartridges eliminate the cost of chemical liquid disposal
- No heating of chemicals and no water supply or air filter required means a more power-efficient unit

Flexibility and ease-of-use

- Supports a wide range of media matte, luster and glossy
- Easy, drylab operation without the hassle of chemical heat-up time
- Easy replacement of consumables and paper dust removal mechanism
- High-capacity cartridges and 65m / 100m (SL-D3000 models only) rolls for fewer changes
- Replace empty cartridges during print runs

Scalable

- System configuration and options can be matched to customer demand, even after installation
- Options include sorters, trays, spindles and extension modules

Productivity

- From 360 to 650 10x15 prints per hour in standard quality
- Designed to cover the production needs for most jobs, using the standard quality mode.

System flexibility behind the counter

Manage orders and printers smoothly with a simple pre-set driven operation using the workflow software for photo print shop. It also features:

- Auto Photo Fine which corrects prints.
- Manual Adjustment
- Red-eye removal

KEY FEATURES

- OrderController handles jobs for up to four D3000/ D700 printers, Epson Stylus Pro printers and other SureColor printers.
- Flexible kiosk input via monitored folders (DPOF), direct browsing, Twain-driven scanners
- Fast, easy photo set production using pre-sets
- SureLab Layout and ID: Add on software for OrderController to create templates and print ID photos
- Highly flexible behind-the-counter solution
- Easy to use supporting different levels of operator experience

SURELAB D7 STUDIO

SureLab D7 Studio base unit

MultiTouch Screen with Intuitive Software Interface.

- Variable print length from 8.9cm to 100cm and width from 10cm to 21cm
- Can produce a wide variety of formats, such as square-shaped photographs, leporellos, panoramics and standard photo sizes
- Long lifecycle of 100,000 prints with permanent parts to minimise service
- High print quality based on our inkjet and image processing technology
- Multi-touch panel can display customised advertising

SureLab D7 Studio scalable system

Customers can simply scale the system by adding up to three extension cabinets with up to two printers in each.

Maximum eight printers, which gives the advantage of: highest productivity when loaded with identical media and highest flexibility when loaded with different media (surface and dimension).

Also, the system can be scaled up or down by removing or increasing singular printers and/or modules during quiet or busier periods, depending on printing demands.

SureLab D7 Studio comes with pre-installed software

Kiosk software.

- The Frontend User Interface (UI) has been designed to make placing customer orders easy, taking full advantage of the Multi-Touch Panel.

Order Manager.

- Back office processing manages orders and allows configuration of the Frontend kiosk software. You can manage several additional extension modules through the back office.
