

# Control, security and efficiency

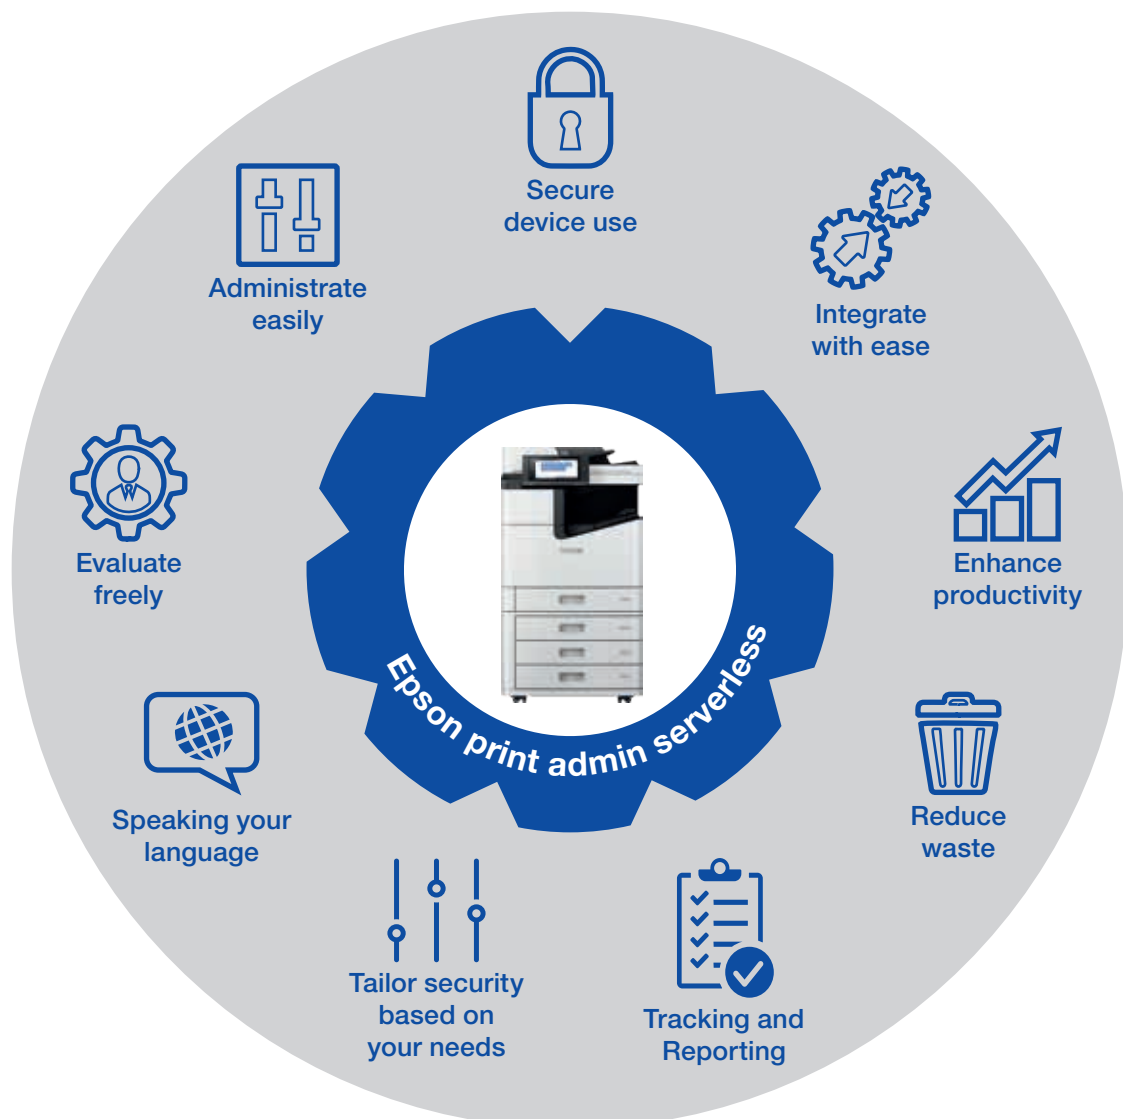

# Increase security and productivity, all without a server

Epson Print Admin Serverless is an advanced solution that creates a secure printing, scanning, and copying environment through user-authentication with card readers, logins/passwords and PIN codes.

EPA Serverless offers advanced features such as 'scan to my folder', 'scan to my email', and intuitive administrative tools that boost environmental goals and efficiency. Based on the Epson Open Platform technology, EPA Serverless enables business customers to seamlessly integrate the WorkForce Enterprise series into their security and compliance requirements.

Whether your staff produce important legal documents, patient records or financial reports, EPA Serverless can give you a complete overview of your printing, copying and scanning volumes. This enables the controlled reduction of your operational expenses.

### Secure device use

User profile authentication protects against unauthorised use of your devices, creating a secure printing, scanning and copying environment. Employees are identified using ID cards, typed login credentials or a pin code.

### Integrate with ease

EPA Serverless allows for seamless integration into your current IT infrastructure, with the support of local user's database on the device or LDAP support.

### Enhance productivity

Personalise the user interfaces on compatible devices to specific employee profiles so they spend less time looking for the right functions, and more time getting things done. The 'scan to my email' feature, increases productivity by sending an email with the scanned document attached to the authenticated user at the touch of a button. Avoid misrouting of captured documents and provide an excellent user experience by storing scanned documents to the pre-defined folder based on authenticated usage through the 'scan to my folder' feature.

### Reduce waste

Documents are only printed once the user releases the job at the device. This eliminates the most common cause of print waste – forgetfulness – while simultaneously enhancing security.

### Tracking and Reporting

Epson Device Admin enables the automated creation of reports and delivery of device and user-level tracking, measurement and analysis of all print/copy/scan/fax activities.

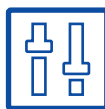

### Tailor the security based on your needs

Enable employees to access some functions without authenticating (e.g. free access to the copy function in Black and White). This allows administrators the flexibility to Administrator to set their security policies based on the requirements.

### Speaking your language

Epson Print Admin Serverless is all about flexibility. It therefore supports 38 languages including English, Arabic, Russian and Hebrew.

### Administrate easily

The solution runs on each device for ease of administration & high flexibility without compromising on the security and productivity features. Epson Device Admin enables the creation and deployment of pre-defined EPA Serverless template settings for batch configuration of multiple devices at a time.

### Evaluate freely

All the benefits of EPA Serverless are yours to enjoy for free for 90 days. Please contact your local Epson reseller for more information on a permanent license.

# Manage and monitor your devices

The free Epson Device Admin software, makes managing your printer and scanner fleet easy. Compatible with a large range of networked printers and scanners, it controls everything via one smart, intuitive interface.

Install, configure, monitor, maintain and troubleshoot your devices remotely and combine better productivity with lower costs.

## Centrally manage all networked printers and scanners

This single solution means you can remotely install, configure, monitor, maintain, troubleshoot and secure the printing and imaging environment. And that means better productivity through reduced time and costs.

## Benefit from Epson Print Admin Serverless

Epson Device Admin enables the creation and deployment of pre-defined EPA Serverless templates settings for batch configuration of devices at a time.

## Save time. Control costs

Epson Device Admin means you can organise your devices based on your needs. For example, organise by geographic location or device type.

## Boost efficiency through an intuitive interface

Epson Device Admin offers an intuitive user interface that quickly performs complex operations. Designed to be efficient and easy to use, it limits the number of steps per task and streamlines software operations.

## Analyse and manage

The monitoring function collects data from devices and delivers status and analysis reports that help keep your fleet running at peak performance. Device reports help cost control and can be sent automatically to email inboxes.
