

Empower productivity with Nuance Equitrac and Nuance eCopy ShareScan

Nuance Unified Client for Epson

When it comes to control, convenience and choice, now there is no equal. Equitrac intelligent print management software makes printing work how you want it to: simply, securely and with maximum savings at every step. One click for any print job and any printer. No worries about print servers, compatible print drivers or whether the printer is ready. And complete accountability reduces costs and increases security.

Not only do these benefits reduce the burden on IT—and corporate budgets—but they make Equitrac the world's most popular print management software for small and large organisations.

A single experience between print and capture

Available for Nuance Equitrac® Office and Equitrac® Express and Nuance eCopy® ShareScan, the Nuance Unified Client™ for Epson provides maximum printing convenience, ease of use and output security from the control panel of supported Epson Open Platform MFPs. It lowers print costs and lets users focus on essential print and capture workflows, while letting IT get back to running the business. Now with a single application for print and capture, your staff will be more efficient, have an enhanced user experience and will ultimately become more productive.

Key benefits

Single application for print and capture: Provides Equitrac print, Equitrac Capture and Send, and eCopy ShareScan capture capabilities within the same user experience. This provides key enhanced functionality at the MFP with a single user experience between print and capture workflows. This single experience delivers increased productivity with reduced time at the MFP since access to key document workflows can be accessed with the same user session.

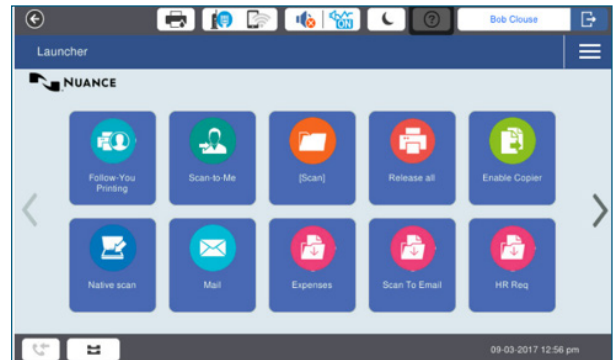

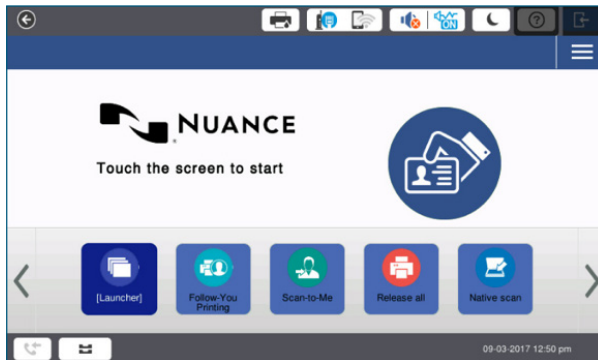

Intuitive user experience: Your staff will benefit from having a consistent user experience across both print and capture workflows. This enhanced user experience will make your staff more productive and efficient as they will be able to access both print and capture workflows from the same client.

Document encryption and enhanced security: The unified client utilises industry standard TLS encryption for secure communication between the unified client and the Nuance servers for added security and protection of your document processes.

Increased satisfaction and productivity: Provide your staff with increased satisfaction and productivity by allowing them to take ownership of their printing behaviour and reducing the time spent at the MFP panel.

Key features

- Quick and simplified log-on experience
 - Intuitive welcome screen
 - Secure dual-factor user authentication
 - Immediate inline error and notification alerts displayed to the MFP user
 - Simple navigation between screens and workflows
 - TLS communication to secure the connection to the Nuance servers
 - Access to native copy, scan and fax functions
 - Full selection of eCopy ShareScan capture workflows with optional document preview and background processing features
-

From the welcome screen quickly and easily access common print and capture workflows, such as Follow-You Printing® and Scan-to-Me® or select the launcher icon to view all of your print and capture workflows. Additionally, the unified client provides a full selection of capture workflows delivered by Nuance eCopy ShareScan. With the intuitive design, easily and quickly log-on, select the appropriate print or capture workflow you wish and get on with your day.*

Seamless integration between Nuance Equitrac and Nuance eCopy ShareScan: The unified client will allow your staff to seamlessly and simply access their capture workflows provided by Nuance eCopy ShareScan, all from one single screen. Your staff can effortlessly move between both the print and capture workflows – all within the same user session on the device.

Key features

– Intuitive welcome screen: The welcome screen provides a quick, easy and simplified log-on experience. This seamless experience increases staff satisfaction and provides an overall better experience at the MFP.

– Secure dual-factor authentication: Users have to authenticate themselves when they login at the device. Authentication protects against misuse and unauthorised use of company MFPs and printers.

– Inline error and notification alerts: Alerts and notifications are displayed immediately to the MFP user via the intuitive notifications bar. This increases staff satisfaction and adoption as error alerts are displayed to the user immediately while at the MFP.

– Equitrac Capture and Send support: Quickly access Capture and Send through the Equitrac application which includes scan to email, scan to folder, scan to

SharePoint, scan to RightFax as well as other OCR functionality.

– Full selection of capture workflows: The unified client provided a full selection of capture workflows delivered by Nuance eCopy ShareScan with optional document preview and background processing.

– Access to native copy, scan and fax functions: The unified client allows logged on staff to switch to the native copy, scan and fax functions within the unified client application.

This single experience for print and capture will make your staff more productive, increase their satisfaction and ultimately lead to a better overall user experience while at the MFP.
