EPSON®

EPSON®
EXCEED YOUR VISION

Accelerate your path to success

The Epson Pro AV Academy is a programme designed to enable sales and engineering professionals to acquire the highest levels of skill and knowledge in Epson's market-leading audio visual technology.

Our in-depth training is delivered by globally recognised industry authorities, allowing you to certify your skills to employers and giving your business a proven edge in the marketplace.

Ultimately, your skills will support businesses in making critical decisions, enable educational establishments to shape the minds of the future and help everyone to enjoy spectacular visual events in museums and galleries.

Who should consider the programme?

The Epson Pro AV Academy is designed for sales people, operators, technicians and service engineers who wish to acquire in-depth knowledge and experience with Epson's products.

What it means for AV engineers and sales professionals

- Validate your skills and knowledge
- Enhance your credibility in the industry
- Support your professional development
- Gain a better understanding of Epson's leading technology

What it means for AV companies

- Expand reach, grow business opportunities and increase revenue
- Prove your competency and expertise in Epson's products
- Deliver a higher level of customer service and satisfaction
- Stay at the forefront of the AV industry by developing a qualified workforce
- Support customers throughout the lifecycle management of their AV technology

Advance your career and certify your expertise

The training is delivered by experienced Epson-approved instructors at our authorised European training centres.

Sessions have small groups, allowing delegates to receive more practical, hands-on training and apply the methodologies and knowledge learned to different scenarios.

You will get to know the latest information on our products, gain access to valuable resources and engage with a community of recognised experts who are committed to continuous improvement.

Certified courses

Epson Certified Pro AV Product Specialist

A one-day course introducing the fundamental technologies used in the Pro AV industry. This course is tailored for those new to the Pro AV market, who want to learn about the key features of current projector technology, while also gaining a comprehensive knowledge surrounding Epson's product range.

Epson Certified Pro AV Field Professional

A detailed two-day course for Pro AV field professionals on the latest installation projector technologies, with a focus on Epson's market-leading projectors. This course gives hands-on training on how to fit, maintain and manage Epson's latest Pro AV products, and provides valuable resources to take away.

Epson Certified Pro AV Software Professional

An overview of Epson's portfolio of advanced and accessible projector management tools, explaining how they support the configuration, monitoring and management of a customer's projector fleet. This course requires knowledge of contemporary projection technology, together with a basic working knowledge of networks.

Learn, practice and get certified

- Instructor-led training
- Practical demonstrations
- Hands-on practice
- Valuable delegate and peer interaction
- Online resources to use during and after class

Learn from leading innovators

We've invested heavily in the development of leading edge technology to bring you innovative products that offer a truly enhanced service for your customers.

With this investment comes the responsibility to develop industry skills and best practice standards, along with supporting you to make the most of our products. We've developed the Pro AV Academy to deliver on these promises and create a community of Pro AV certified professionals.

State-of-the-art learning environments

Training will take place at Lang Academy and AED Display NV, two of Europe's leading AV rental companies. The modern, spacious further education centres help support practical training, research and interactive learning.

Expert trainers

Training will be run by Anika Lauth, Tobias Kahlmann and Niels Malezsewski, all recognised for their knowledge and technical expertise in the visual display industry.

Anika Lauth
Product Manager Projector, Lang AG

Anika is responsible for the testing and evaluation of new projector products and is the customer contact for any technical-related issues. She is heavily involved with troubleshooting and new product development, and conducts product training both internally and for customers.

Tobias Kahlmann
Head of Service Department, Lang AG

Tobias is responsible for managing internal and external projector repairs, as well as coordinating parts for servicing. His previous roles include work as a service engineer and the specialist for event engineering.

Niels Malezsewski
Product Manager - Video Projectors - AED Display NV

Niels has 10 years' experience in the field as a video engineer and product specialist. He is responsible for the management of the complete projector product range and supports clients with all aspects of professional display installation, operation and maintenance.
