

# TEST CERTIFICATE

## BS 5609 (Section Three)

**Client:** Epson Europe B.V.

**Product reference:** Epson PP Matte Premium

**Base substrate:** PP INKJET MATT WHITE PREMIUM ON-DEMAND 85

**Adhesive code:** RPAF

**Printer make and model:** Epson ColorWorks CW-C4000 MK series

**Print process:** Inkjet

**Ink supplier:** Epson

**Ink colour(s) and code:** SJIC42P (CMY MK)

**Smithers Ref:** 24-1003133 W1 (Section 2 Reference: 22-170438 X2)

Tests passed	Test methods	Standard reference
Print key effectiveness *	H,G	8.1
Abrasion resistance *	J,G	8.2
Permanence of print	E,G	8.3

\*Conditional Pass

**This is to certify that the above label material has been tested by Smithers and conforms to BS 5609:1986 Section 3 – Printed pressure-sensitive, adhesive coated labels.**

**Signed:**   
Dave Stone

**Dated: 1<sup>st</sup> August 2024**

*Any measurement has some uncertainty, which is mainly due to the accuracy and precision of the method and equipment used to make the measurement. This needs to be taken into account for UKAS accredited (ISO 17025) testing when results are reported against a specification. The uncertainty of measurement is assessed and this is used to calculate the probability of false acceptance (passing a result that should fail) or false rejection (failing a result that should pass).*

*In order to qualify as a Pass there must be a 5% or less chance of a false positive. Where the recorded result is within specification, but there is a more than 5% chance that it could have been out of specification, a "Conditional Pass" is reported. This 'non-binary acceptance' approach is defined in ILAC G8:09/2019 Guidelines on Decision Rules and Statements of Conformity.*
